

peronda

THE INNER LOGIC PARTE DE UNA
FILOSOFÍA PROPIA QUE ENTIENDE
CADA COLECCIÓN COMO LA EXPRESIÓN
DE UNA COHERENCIA INTERNA.

Bajo este concepto, Peronda propone una manera de hacer guiada por el criterio y por una voluntad constante de evolución, capaz de cuestionar lo establecido y de abrir un camino distinto dentro del diseño cerámico. Cada pieza refleja esa visión a través de superficies desarrolladas con una relación precisa entre intención y tecnología, llevando la innovación hacia un territorio más refinado y sofisticado.

Esa lógica interna atraviesa todo el catálogo y da forma a una identidad que se reconoce en la manera de interpretar la materia, en la precisión con la que se construye cada propuesta y en la ambición de seguir yendo más lejos. The Inner Logic define una forma de pensar que impregna la marca y acompaña cada novedad desde su origen hasta su expresión final.

POWERED BY **peronda**

THE INNER LOGIC

THE INNER LOGIC IS GROUNDED IN A
DISTINCTIVE PHILOSOPHY THAT SEES EACH
COLLECTION AS THE EXPRESSION
OF AN INTERNAL COHERENCE.

Within this concept, Peronda presents a way of working
guided by discernment and by a constant drive to evolve,
challenging established conventions and opening a
different path in ceramic design.

Each piece reflects that vision through surfaces
developed from a precise relationship between intention
and technology, taking innovation into a more refined
and sophisticated realm.

This internal logic runs throughout the catalogue and
shapes an identity that can be seen in the way matter is
interpreted, in the precision with which each proposal
is constructed, and in the ambition to keep pushing
further. The Inner Logic defines a way of thinking that
permeates the brand and accompanies each new product
from its origin to its final expression.

SOSTENIBILIDAD

MEDIOAMBIENTAL Y SOCIAL

PERONDA GROUP S.A. HA ASUMIDO EL COMPROMISO
DE ESTABLECER, IMPLANTAR Y MANTENER UN SISTEMA
DE GESTIÓN DE LA CALIDAD DE SUS ACTIVIDADES
BASADO EN LA NORMA UNE-EN ISO 14001.

En línea con la filosofía medioambiental de la organización, el principal objetivo de este sistema de gestión es el respeto y la protección del medio ambiente, basado en los siguientes principios:

- Compromiso de cumplir con los requisitos legales y los requisitos aplicables.
- Compromiso con la protección del medioambiente, incluida la reducción y/o prevención de la contaminación.
- Fomentar los procesos innovadores y eficientes, con el objetivo de reducir los impactos ambientales asociados, la contaminación a la atmósfera, las emisiones de CO2 y los residuos generados.
- Compromiso para aumentar la flexibilidad de los procesos de producción y mejorar la productividad mediante el aumento de la calidad de nuestros productos y la eficiencia de nuestros procesos.
- Compromiso con la formación y sensibilización del personal: Proporcionar formación y sensibilización ambiental continuada a todos los empleados de la empresa con el fin de aumentar y mejorar su competencia profesional, su adaptación a los nuevos cambios y procesos innovadores y mejora de la actitud positiva hacia la sostenibilidad.

La dirección de PERONDA GROUP, S.A. se compromete a transmitir y hacer cumplir la política ambiental en todos los niveles de las organizaciones y en todas las etapas del proceso de producción.

ENVIRONMENTAL AND SOCIAL SUSTAINABILITY

PERONDA GROUP S.A. HAS COMMITTED ITSELF TO
ESTABLISHING, IMPLEMENTING AND MAINTAINING
A QUALITY MANAGEMENT SYSTEM FOR ITS ACTIVITIES,
BASED ON THE UNE-EN ISO 14001 STANDARD.

In keeping with the company's environmental philosophy, the main aim of this management system is to care for and protect the environment, based on the following principles:

- To comply with legal requirements and any other applicable ones.
- To protect the environment, including the reduction and/or prevention of pollution.
- To promote innovative efficient processes in order to reduce associated environmental impacts, atmospheric pollution, CO2 emissions and generated waste.
- To boost the flexibility of production processes and to improve productivity by raising the quality of Peronda's products and the efficiency of its processes.
- Staff training and a raised environmental awareness: To provide ongoing environmental training to all the company staff in order to boost their professional skills, help them to adapt to new changes and innovative processes, and foster a positive attitude to sustainability.

The Management of PERONDA GROUP, S.A. undertakes to make the company's environmental policy known and to ensure compliance with it at all levels of its different organizations and in all stages of the production process.

SOSTENIBILIDAD

MEDIOAMBIENTAL Y SOCIAL

COMPROMISO REAL MEDIO AMBIENTAL

La ecología no es una moda. Ser respetuosos con el medio ambiente es algo que llevamos haciendo desde hace casi dos siglos. Somos conscientes de nuestra responsabilidad como fabricantes y, por tanto, trabajamos continuamente para minimizar nuestro impacto en el entorno.

No solo somos capaces de producir las piezas cerámicas más innovadoras, sino que nuestro orgullo es poder decir que lo hacemos desde una óptica atemporal de respeto hacia todos aquellos que heredarán nuestro planeta. Por eso, hemos llevado a cabo diferentes actuaciones buscando construir una sociedad más sostenible.

VIDA ÚTIL

Nuestras baldosas cerámicas tienen una vida útil de hasta 50 años, lo que reduce su impacto ambiental frente a otros materiales de construcción.

PLATAFORMAS SOSTENIBILIDAD

Participamos activamente en ECOVADIS y SEDEX, para evaluar nuestro desempeño sostenible y el de nuestra cadena de suministro.

EDIFICACIÓN SOSTENIBLE

Nuestras baldosas contribuyen a la construcción sostenible gracias a:

- _Emisión cero de COV's (compuestos orgánicos volátiles).
- _Facilidad de limpieza.
- _Alta reflexión solar, disminuyendo el efecto "isla de calor".
- _Durabilidad y reciclabilidad.
- _Impacto positivo en la eficiencia energética.
- _Cuantificación de los impactos ambientales a través de la DAP (Declaración Ambiental de Producto).

CERTIFICACIONES

Certificaciones de sistemas y procesos.

Contamos con las certificaciones:

- _ISO 14001: Gestión ambiental.
- _ISO 9001: Gestión de calidad.
- _Informe de Huella de Carbono

Certificaciones de productos.

Nuestros productos cuentan con certificaciones como:

- _GlobalEPD (Declaración Ambiental de Producto) según ISO 14025.
- _FDES (Fiche de déclaration environnementale et sanitaire).
- _ISO 14021 que certifica el contenido en material reciclado.

EMISIONES ATMOSFÉRICAS

Minimización de la emisión de partículas a la atmósfera mediante el funcionamiento en continuo de sistemas de depuración de aire, como los filtros de mangas, para la reducción de las emisiones de partículas (que se recuperan y se reutilizan en la fabricación de atomizado) y la mejora de la calidad del aire.

REAL ENVIRONMENTAL COMMITMENT

Ecology is not a passing trend. Environmental care has been an intrinsic part of our philosophy for almost two centuries. We are aware of our responsibility as manufacturers. That's why we strive at all times to minimize our impact on the environment.

Not only are we capable of producing amazingly innovative tiles. We are also proud to say that we do it in a forward-looking way by caring for the planet so that future generations can enjoy it. Therefore, we have undertaken various actions aimed at building a more sustainable society.

SERVICE LIFE

Our ceramic tiles have a lifespan of up to 50 years, which significantly reduces their environmental impact compared to other construction materials.

SUSTAINABILITY PLATFORMS

We actively participate in ECOVADIS and SEDEX to evaluate our sustainability performance and that of our supply chain.

SUSTAINABLE BUILDING

Our tiles contribute to sustainable construction through:

- _Zero emission of VOCs [volatile organic compounds].*
- _Ease of cleaning.*
- _High solar reflectance, reducing the 'heat island' effect.*
- _Durability and recyclability.*
- _Positive impact on energy efficiency.*
- _Environmental impact quantification through the EPD [Environmental Product Declaration].*

CERTIFICATIONS

Certifications for systems and processes.

We have the following certifications:

- _ISO 14001: Environmental Management.*
- _ISO 9001: Quality Management.*
- _Carbon Footprint Reporting.*

Product certifications.

Our products are certified by:

- _GlobalEPD [Environmental Product Declaration] under ISO 14025.*
- _FDES [Fiche de déclaration environnementale et sanitaire].*
- _ISO 14021, certifying recycled content.*

ATMOSPHERIC EMISSIONS

Minimization of particle emissions into the atmosphere through the continuous operation of air purification systems such as bag filters to reduce particle emissions [which are recovered and reused in the production of atomized material] and improvement of air quality.

ENVIRONMENTAL AND SOCIAL SUSTAINABILITY

GESTIÓN DE RESIDUOS

Reutilizamos el 100% de los residuos arcillosos y aguas industriales en el proceso de fabricación de la materia prima arcillosa. Reutilizamos el 100 % de los residuos de baldosas cocidas que se han desechado, y gestionamos eficientemente los envases de cartón, plástico y madera a través del SCRAP (Sistemas Colectivos de Responsabilidad Ampliada del Productor).

CAMBIO CLIMÁTICO Y REDUCCIÓN DE LAS EMISIONES CO₂

_Optimización de todas las etapas del proceso productivo, lo que se traduce en una optimización de la energía consumida y en un aumento de la eficiencia.

_Instalación de recuperadores de calor y quemadores de alta eficiencia para disminuir el consumo térmico y las emisiones de CO₂.

_Instalación de luminarias tipo LED que han permitido un ahorro energético de hasta 250.000 kWh/año en consumo de energía eléctrica.

_Protocolos de detección de fugas de calor para reducir y/o eliminar las pérdidas y, con ello, reducir el consumo de energía térmica.

_Reducción de las emisiones de CO₂ debido a la conducción de carretillas elevadoras 100% eléctricas en toda la cadena de producción.

_Instalación 15.000 m² de placas fotovoltaicas que nos ha permitido un ahorro energético de 1.685.000 kWh y una reducción de 478 tCO₂.

_Aplicación de las medidas de eficiencia energética derivadas de la auditoría energética.

ECODISEÑO

_Uso de plástico para el embalaje de los pallets con un contenido en material reciclado de hasta el 46%.

_Utilización de una tecnología limpia basada en el uso de tintas en base agua para la decoración digital de las baldosas cerámicas, evitando la generación de residuos de disolvente y haciendo el proceso de decoración digital más sostenible.

_Todos nuestros productos son envasados en embalajes de cartón 100% reciclados.

HUELLA DE CARBONO

En línea con el compromiso que la empresa adquiere con la protección del entorno natural, además de asegurar el cumplimiento de todas las regulaciones ambientales aplicables, nos esforzamos por conocer y comprender las emisiones de gases de efecto invernadero generadas por nuestra actividad. A través de este conocimiento, buscamos promover activamente la reducción de dichas emisiones, en línea con nuestros objetivos de sostenibilidad y responsabilidad ambiental. En esta línea, la organización aborda la determinación de la Huella de Carbono de organización según los requisitos y recomendaciones definidos en el estándar internacional GHG Protocol [Greenhouse Gas Protocol].

WASTE MANAGEMENT

We reuse 100% of clay waste and industrial water in the production of clay-based raw materials. We also reuse 100% of discarded fired tiles and efficiently manage cardboard, plastic, and wood packaging through the SCRAP (Extended Producer Responsibility Systems).

CLIMATE CHANGE AND CO₂ EMISSION REDUCTION

_The optimization of all stages of the production process, leading to optimized energy consumption and increased efficiency.

_Installation of high efficiency heat recovery systems in order to diminish thermal demand and CO₂ emission.

_Installation of LED lamps which represents a saving of electric energy consumption of 250.000 kWh a year.

_Heat leak detection protocols to reduce and/or eliminate losses and thereby reduce thermal energy consumption.

_Reduction of CO₂ emission by driving 100% electric forklifts during the whole production line.

_Installation of 15,000 m² of photovoltaic panels, resulting in energy savings of 1,685,000 kWh and a reduction of 478 tCO₂.

_Implementation of energy efficiency measures derived from the energy audit.

ECO-DESIGN

_Use of plastic for pallet packaging with a recycled material content of up to 46%.

_Utilization of clean technology based on the use of water-based inks for the digital decoration of ceramic tiles, avoiding the generation of solvent waste and making the digital decoration process more sustainable.

_All our products are packaged in 100% recycled cardboard packaging.

CARBON FOOTPRINT

Aligned with our commitment to protecting the natural environment—and in addition to complying with all applicable environmental regulations—we work to understand and measure the greenhouse gas emissions generated by our activities. This knowledge allows us to actively promote emission reductions, in line with our environmental responsibility goals. We assess our organizational carbon footprint following the guidelines and requirements of the international GHG Protocol [Greenhouse Gas Protocol].

SOSTENIBILIDAD MEDIOAMBIENTAL Y SOCIAL

ECONOMÍA CIRCULAR

Todos los productos de la marca PERONDA están fabricados siguiendo este modelo de producción basado en la ECONOMÍA CIRCULAR. Esta metodología de fabricación está en línea con la filosofía sostenible seguida por la empresa en todas sus actividades basada en la minimización del consumo de recursos naturales y desechos generados y priorizando el uso de materiales reciclados con el fin de minimizar el impacto ambiental.

Todas las referencias fabricadas en PERONDA contienen como mínimo un 20% de material reciclado certificado mediante la norma ISO 14021, logrando obtener productos más sostenibles y respetuosos con el medio que nos rodea.

_Reutilización del 100% de desechos del proceso de prensado y esmaltado, lo que supone un reciclado de 3.812.000 Kg anuales.

_Reutilización del 100% de los desechos de baldosas cocidas, lo que supone el reciclado de 4.400.000 Kg anuales.

_Aprovechamiento del 100% de las aguas residuales, logrando un vertido cero: más de 16 millones de litros anuales son reutilizados.

_Identificación continua de vías para la valorización de residuos.

COMPROMISO ÉTICO Y SOCIAL

La organización cuenta con una política de igualdad, manual de conducta del empleado/a y código ético, como documentos que definen nuestro comportamiento social. Nuestros valores y pautas de comportamiento son:

_Establecer y desarrollar políticas que integran la igualdad de trato y oportunidades entre mujeres y hombres, sin discriminación de sexo, raza o religión.

_Ambiente de trabajo igualitario.

_Proporcionar la formación necesaria para contribuir al desarrollo profesional de los trabajadores/as. Anualmente se definen los programas de formación de los empleados.

_Compromiso de la empresa contra el trabajo infantil.

_Respeto a la legislación vigente, derechos humanos y ética.

_Garantía de seguridad y salud laboral.

_Respeto a las personas y trabajo digno.

_Buen gobierno y comportamiento ético.

_Fomento de la competencia leal y desarrollo social.

INFORME HUELLA DE CARBONO:

Documento donde se determina la cantidad de emisiones de los gases de efecto invernadero asociadas a la actividad de la organización.

INFORME DE SOSTENIBILIDAD

(informe de estados no financieros):

La empresa elabora anualmente el informe de sostenibilidad para comunicar, de manera transparente, su desarrollo sostenible en base a las acciones relacionadas con el medioambiente y la gobernanza. Mediante este informe la empresa demuestra el compromiso con la sostenibilidad.

Si deseas más información o acceder a estos contenidos, no dudes en solicitarlos en info@peronda.com

ENVIRONMENTAL AND SOCIAL SUSTAINABILITY

CIRCULAR ECONOMY

All products under the PERONDA brand are manufactured following this circular economy production model. This manufacturing methodology aligns with the sustainable philosophy pursued by the company in all its activities, aiming to minimize the consumption of natural resources and waste generated while prioritizing the use of recycled materials to minimize environmental impact.

All references manufactured by PERONDA contain a minimum of 20% certified recycled material according to ISO 14021, achieving more sustainable products that are respectful of the surrounding environment.

_100% reuse of pressing and glazing waste, amounting to 3,812,000 kg annually.

_100% reuse of fired tile waste, totaling 4,400,000 kg annually.

_100% recovery and reuse of wastewater, achieving zero discharge—more than 16 million liters per year.

_Continuous identification of new waste recovery and valorization strategies

ETHICAL AND SOCIAL COMMITMENT

The organization has a policy of equality, an employee code of conduct, and an ethical code as documents that define our social behavior. Our values and behavioral guidelines include:

_Establishing and developing policies that integrate equal treatment and opportunities between women and men, without discrimination based on gender, race, or religion.

_Providing an equal working environment.

_Provide the necessary training to contribute to the professional development of the employees. Annually, the training programs for employees are defined.

_Company commitment against child labor.

_Compliance with legislation, human rights, and ethical standards.

_Guarantee of occupational health and safety.

_Respect for individuals and dignified work.

_Good governance and ethical conduct.

_Promotion of fair competition and social development.

CARBON FOOTPRINT REPORT:

Document that determines the amount of greenhouse gas emissions associated with the organization's activity.

SUSTAINABILITY REPORT

(Non-Financial Statement Report):

The company prepares an annual sustainability report to transparently communicate its sustainable development based on actions related to the environment and governance. Through this report, the company demonstrates its commitment to sustainability.

For more information or to request these materials, feel free to contact us at info@peronda.com

CERTIFICADOS DE CALIDAD Y MEDIO AMBIENTE

CALIDAD

Sistema de gestión de la calidad basado en la norma internacional UNE-EN ISO 9001. Certifica la mejora continua de todos los procesos, productos y servicios de la organización con el objetivo de aumentar la satisfacción de todas nuestras partes interesadas.

Declara la conformidad de nuestros productos con los requisitos establecidos en el Mercado CE que establece que un producto es evaluado antes de ser introducido en el mercado y que cumple con los requisitos de seguridad, salud y protección medioambiental aplicables.

El Certificado CCC es un sistema de certificación obligatorio para las exportaciones a China que garantiza que los productos con baja absorción de agua ($E < 0.5\%$) cumplen con los requisitos de seguridad y calidad establecidos.

Es una certificación de aprobación de productos, emitido por el Instituto Francés CSTB, y verifica la idoneidad técnica de productos de primera calidad en relación al tipo de uso destinados.

La Saudi Quality Mark (SQM) es una marca de calidad regulada por SASO (Organización Saudita de Estándares, Metrología y Calidad) para poder realizar exportaciones al país.

MEDIO AMBIENTE

Sistema de gestión medioambiental basado en la norma internacional UNE-EN ISO 14001. Sistema que certifica el cumplimiento de todos los requisitos legales de aplicación y garantiza la minimización de los impactos ambientales asociados a los procesos de la organización en línea con nuestro compromiso de sostenibilidad.

Es una Declaración Ambiental de Producto de conformidad con la Norma UNE-EN ISO 14025, que proporciona información medioambiental basada en el ciclo de vida de nuestros productos.

Sistema de certificación de edificios sostenibles desarrollado por U.S. Green Building Council®. Nuestros productos pueden contribuir a obtener puntos para la certificación LEED.

Sistema de certificación de edificios sostenibles desarrollado por Building Research Establishment. Nuestros productos pueden contribuir a obtener puntos para la certificación BREEAM®.

Etiqueta medioambiental para el mercado francés que informa sobre el contenido en COV's (Compuestos Orgánicos Volátiles). Declara que nuestros productos son de tipo A+, contribuyendo a un hábitat sano y respetuoso con el medioambiente.

Certificación que respalda y avala la comunicación ambiental honesta y transparente, asegurando que las afirmaciones relacionadas con el desempeño ambiental de los productos cumplan con estándares reconocidos a nivel internacional.

Documento que se utiliza para informar sobre el impacto ambiental y sanitario de nuestros productos. Se basa en los resultados del Análisis del Ciclo de Vida, con información adicional sobre salud.

QUALITY AND ENVIRONMENTAL CERTIFICATES

QUALITY

Quality management system in compliance with ISO 9001 norm. Certifies a continuous improvement of processes, products and services, the objective of which is the complete satisfaction of all our involved parties.

This declares that our products comply with the stipulations of the CE marking, under which a product must be assessed before it is put on sale and comply with the applicable health, safety and environmental requirements.

The CCC certificate is compulsory for products exported to China. It guarantees that products with a low water absorption rate ($E < 0.5\%$) comply with the safety and quality requirements.

This is a product approval certificate, issued by the French Institute CSTB, who verifies the technical suitability of top quality products in relation to the type of use intended.

The Saudi Quality Mark (SQM) is a quality mark regulated by SASO (Saudi Standards, Metrology, and Quality Organization) in order to conduct exports to the country.

ENVIRONMENT

Environment management system in compliance with the UNE-EN ISO 14001 standard. Certifying system for application requirements which guarantee minimization of environmental impact, according to our commitment to sustainability.

An Environmental Product Declaration in compliance with the UNE-EN ISO 14025 standard, which provides environmental info based on the lifecycle of our products.

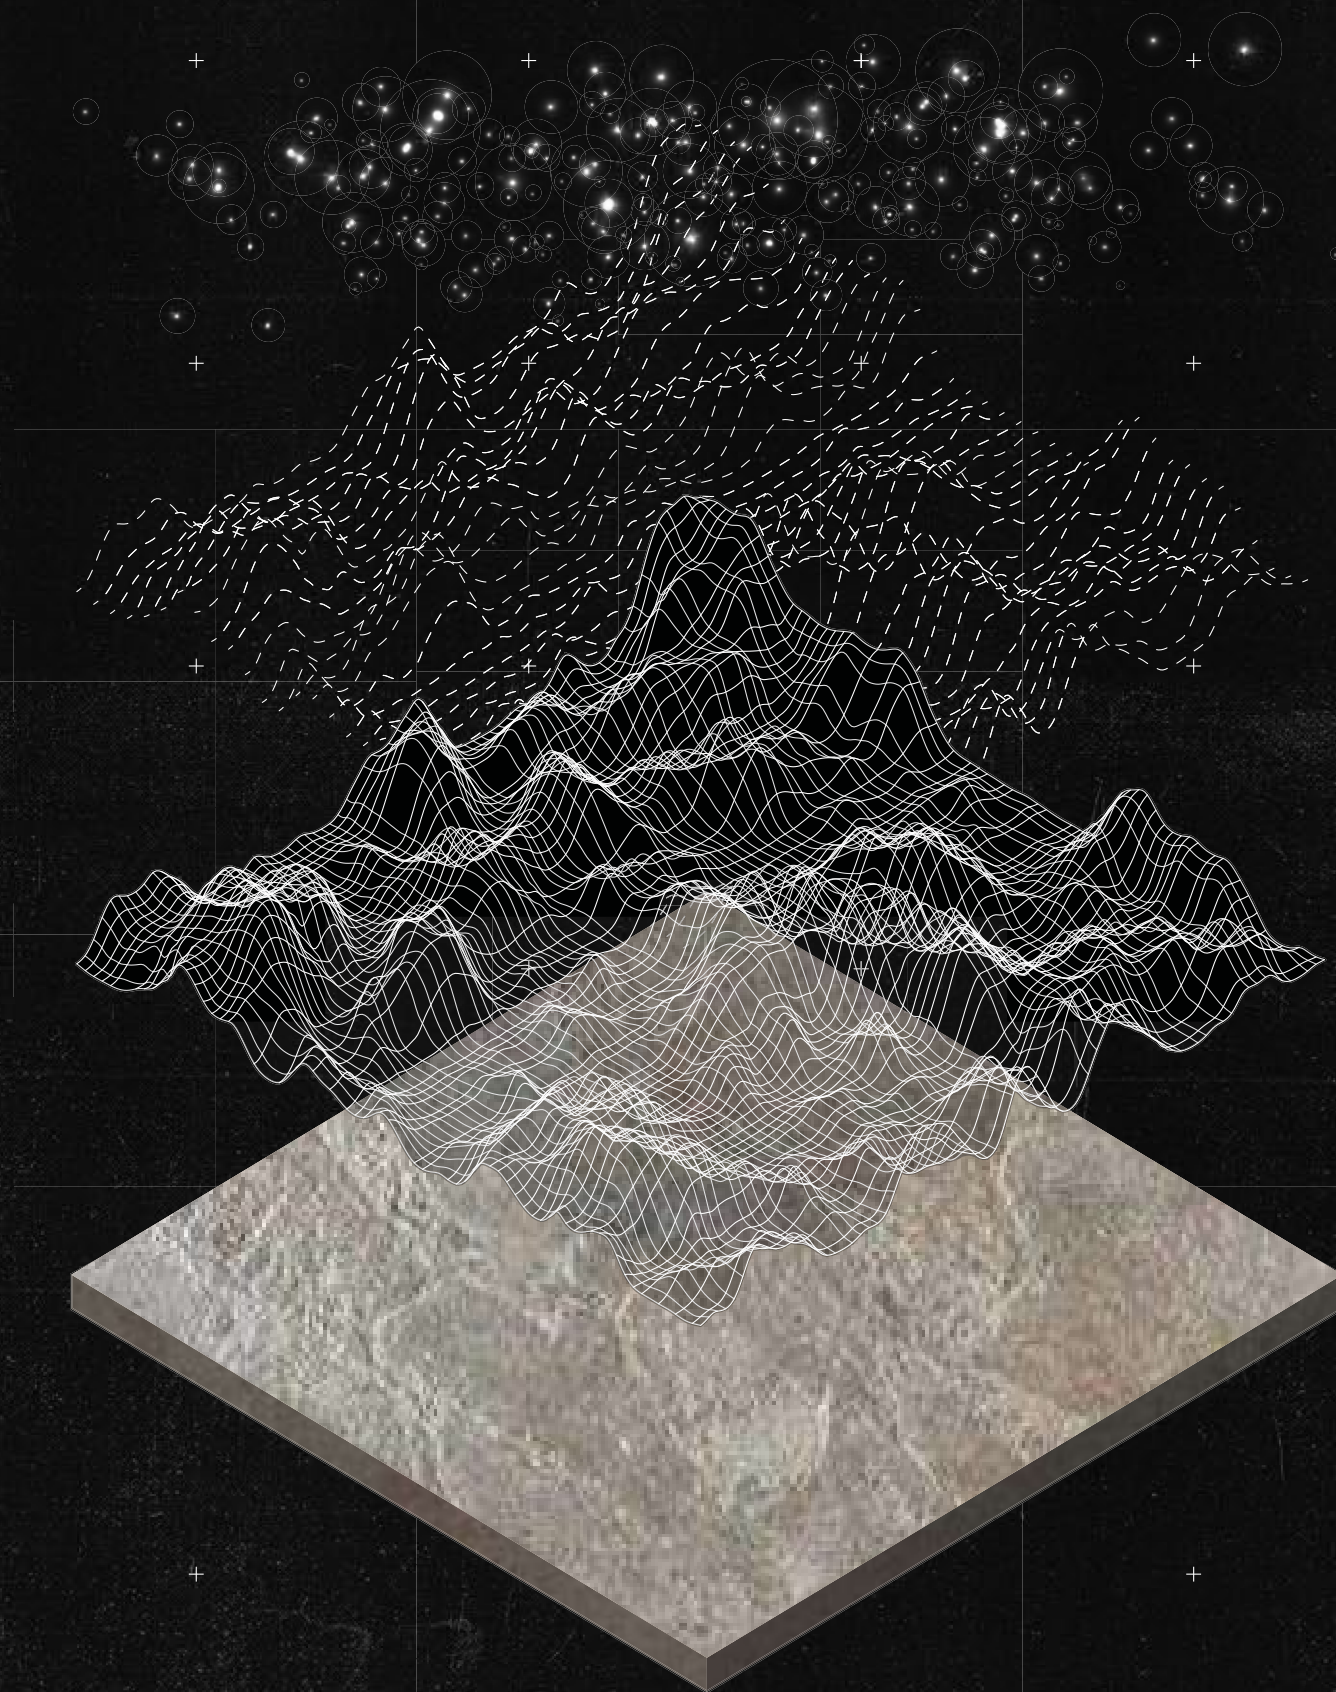

A sustainable building certification system developed by U.S. Green Building Council®. Our products can contribute to obtain points for LEED certification.

A sustainable building certification system developed by Building Research Establishment. Our products can contribute to obtain points for BREEAM® certification.

An environmental label for the French market, which provides information on the VOC content (volatile organic compounds). It declares that our products are rated A+, contributing to a healthy environmentally-friendly habitat.

Certification that supports and endorses honest and transparent environmental communication, ensuring that claims related to the environmental performance of products comply with internationally recognized standards.

Document used to report the environmental and health impact of our products. It is based on the results of the Life Cycle Assessment (LCA), includes additional health-related information.

Strata Tech es el resultado de unir dos de las tecnologías más avanzadas de Peronda: Shaped y Layer Tech. Esta sofisticada técnica combina lo mejor de ambas innovaciones para dar vida a piezas cerámicas que destacan por su realismo, precisión y acabado.

Por un lado, Shaped aporta su capacidad de crear relieves digitales perfectamente coordinados con la gráfica, generando texturas naturales y detalladas como nunca antes vistas en cerámica.

Por otro lado, Layer Tech introduce la posibilidad de superponer capas de materiales, colores y formas, logrando

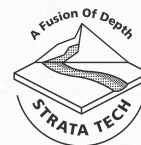

efectos visuales y táctiles únicos mediante procesos de adición y eliminación precisa de granilla.

Con Strata Tech, Peronda redefine los límites del diseño cerámico, abriendo un mundo de posibilidades infinitas en la decoración de superficies.

La precisión del bajo relieve, combinada con texturas multicapa de gran impacto visual, permite crear piezas que no solo son innovadoras en su diseño, sino también inigualables en su calidad técnica.

STRATA TECH

A FUSION
OF DEPTH

Strata Tech is the result of combining two of Peronda's most advanced technologies: Shaped and Layer Tech. This sophisticated technique merges the best of both innovations to create ceramic pieces that stand out for their realism, precision, and finish.

On one hand, Shaped brings its ability to produce digitally crafted reliefs perfectly synchronized with the graphics, creating natural and detailed textures never before seen in ceramics.

On the other hand, Layer Tech enables the layering of materials, colors, and shapes, achieving unique visual and tactile effects

through processes of precise addition and removal of granilla.

With Strata Tech, Peronda redefines the boundaries of ceramic design, opening up a world of infinite possibilities in surface decoration.

The precision of low relief, combined with multilayer textures of great visual impact, allows for the creation of pieces that are not only innovative in design but also unparalleled in technical quality.

SHARP TECH REPRESENTA EL MAYOR
SALTO TÉCNICO EN REVESTIMIENTO
DE LA ÚLTIMA DÉCADA.

Con este nuevo acabado, Peronda vuelve a liderar el mercado de la pasta blanca, alcanzando niveles de definición solo posibles para los fabricantes más exigentes.

Estos relieves exclusivos marcan un antes y un después en la forma de entender la precisión y el diseño cerámico. Por un lado, nuevas técnicas en la prensa permiten un control extremo del perfil y la forma, logrando relieves de una nitidez nunca vista.

Por otro, las innovadoras formulaciones de esmaltes de alta definición hacen posible los decorados más perfilados del mercado, donde cada línea, cada volumen y cada transición se expresan con máxima claridad.

Con Sharp Tech, la precisión técnica se une a una nueva sensibilidad estética.

Relieves de gran fuerza visual que, al mismo tiempo, mantienen una superficie suave al tacto.

Tecnología de vanguardia al servicio de un diseño contemporáneo, donde el detalle extremo y la sofisticación marcan el camino del futuro.

SHARP TECH REPRESENTS THE BIGGEST
TECHNICAL LEAP IN WALL COVERINGS
OF THE LAST DECADE.

With this new finish, Peronda once again leads the white body market, reaching levels of definition achievable only by the most demanding manufacturers.

These exclusive reliefs mark a turning point in the way precision and ceramic design are understood. On the one hand, new pressing techniques allow extreme control over profile and shape, achieving reliefs with unprecedented sharpness.

On the other, innovative high-definition glaze formulations make it possible to create the most sharply defined decorations on the market, where every line, volume and transition is expressed with maximum clarity. With Sharp Tech, technical precision meets a new aesthetic sensitivity.

Reliefs with strong visual impact that, at the same time, remain soft to the touch. Cutting-edge technology at the service of contemporary design, where extreme detail and sophistication point the way forward.

SHARP TECH

HIGH DEFINITION
CONTOUR

NATURAL

Las texturas, los recovecos, las vetas que crea la naturaleza son caprichosas, y esa es la fuente de su belleza. No hay dos iguales, y en su singularidad radica su belleza. La pasión por la búsqueda del detalle ha llevado a Peronda a desarrollar una tecnología capaz de reproducir la naturaleza en su máxima expresión, que es captando hasta el mínimo detalle. Los relieves son creados con tecnología digital perfectamente coordinada con la impresión gráfica para generar las piezas más naturales vistas en cerámica.

PRECISO

Donde ponemos el relieve ponemos la tinta. La precisión con la que imprimimos nuestras piezas es milimétrica, pues relieve y gráfica casan a la perfección para obtener un resultado técnicamente inmejorable.

REAL

Nada de ilusiones ópticas, esto es real. Lo que ves y lo que tocas es lo mismo. La veta está donde está el relieve y viceversa. Lo que siempre quisimos en cerámica, ahora lo consigue Peronda.

NATURAL

The textures, sinuosity and veining found in nature all follow capricious rules, and it is this random nature that makes them so very lovely. Nothing is ever identical and this singularity is the secret to nature's beauty.

Peronda's passion for detail has led it to develop technology able to reproduce nature in its maximum of expressions, captured down to the tiniest of details. Digital technology is used to create textures that coincide perfectly with the printed pattern, leading to some of the most natural looking designs ever to be seen on ceramic tiles.

PRECISE

Our printing inks reach each and every part of the printed texture. The tiles are printed with absolute precision, carefully marrying the design with the corresponding texture to unparalleled technical effect.

REAL

There are no optical illusions. Everything is real. What you see and what you touch are one and the same thing. The printed veins coincide perfectly with the texture. Everything you have always longed for in ceramic tiles has now been achieved by Peronda.

SHAPED TECH

REAL

PRECISION

USOS ILIMITADOS. MISMA SUPERFICIE

¿Imaginas poder tener un mismo suelo con iguales cualidades en todos los espacios de tus proyectos?

El acabado All in one aúna suavidad y antideslizamiento. Ahora no hay por qué elegir, puedes tenerlo todo en un único producto. Mejoras destacadas:

- Zonas húmedas ahora son más suaves y fáciles de limpiar gracias al nuevo acabado de Peronda.
- El nuevo acabado All in one de Peronda permite reducir el stock al satisfacer diversas necesidades técnicas con una sola referencia.
- Mayor armonía al poder transitar del salón a la terraza sin preocuparse por los formatos o tonos, gracias a la colocación sin límites que brinda continuidad estética.

UNLIMITED PURPOSES. SAME SURFACE

Can you imagine having the very same flooring with identical features in every single space of your project? All in one finish brings softness and anti slip treatment together. There is no need to choose any more. You can have it all in just one product. Highlights:

- Humid areas are now smoother and easier to clean with Peronda's new finish, providing increased softness and cleanliness.
- Peronda's new finish, All in one, allows for stock reduction by offering a single product that meets various technical requirements for your project.
- The freedom of placing materials without limitations creates a sense of aesthetic continuity, enabling seamless transitions from the living room to the terrace, irrespective of formats or tones.

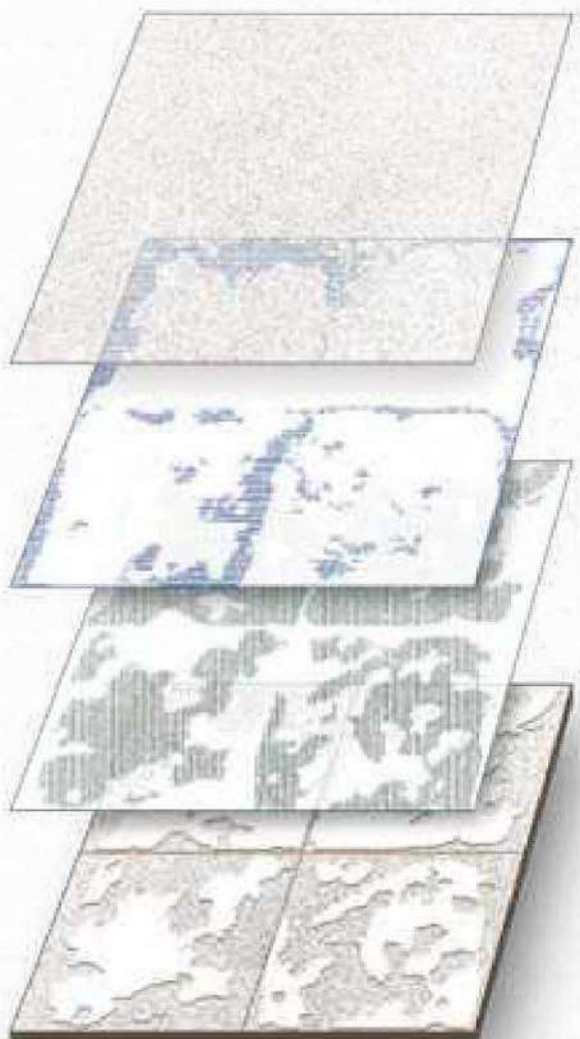

ALL IN ONE

ANTISLIP
SOFT

Layer Tech es la última tecnología de decoración cerámica, que permite crear texturas en diferentes capas de la superficie generando efectos variados en una misma pieza. Acabados espectaculares hasta ahora imposibles de conseguir en cerámica.

Con esta técnica se abre un infinito abanico de posibilidades en decoración cerámica puesto que se trata de combinar distintas materias, colores y formas en un proceso de adición en el que cada combinación puede generar un efecto totalmente nuevo y sorprendente.

LAYER TECH

MULTI TEXTURE
SURFACE

Layer Tech is the latest in tile printing technology. With it, textures can be created on different surface layers, generating varying effects on the same tile. This leads to hitherto unimaginable spectacular finishes on the tiles.

Layer Tech technology opens up endless new possibilities in ceramic tile printing, since different materials, colours and shapes can be combined. In this additive process, each combination gives rise to a totally new amazing effect.

DEEP TECH

MAXIMUM

RELIEF

Deep Tech es una innovadora tecnología que lleva el relieve cerámico a una nueva dimensión. Gracias a su avanzada precisión, permite crear texturas con una profundidad extraordinaria de hasta 8 mm, logrando superficies que no solo se ven, sino que también se sienten.

Con Deep Tech, cada pieza adquiere una fuerza visual y táctil inigualable, capaz de transformar cualquier espacio en una experiencia sensorial. Esta tecnología abre un nuevo universo de posibilidades decorativas, donde el volumen, la sombra y la luz se combinan para dar vida a diseños de gran carácter y realismo.

El resultado son superficies impactantes y llenas de expresión, que redefinen los límites del diseño cerámico contemporáneo.

Deep Tech is an innovative technology that takes ceramic relief to a new dimension. Thanks to its advanced precision, it allows for the creation of textures with extraordinary depth of up to 8 mm, achieving surfaces that are not only seen but also felt.

With Deep Tech, each piece acquires unparalleled visual and tactile strength, capable of transforming any space into a sensory experience. This technology opens up a new universe of decorative possibilities, where volume, shadow, and light combine to bring designs of great character and realism to life.

The result is striking surfaces full of expression, redefining the limits of contemporary ceramic design.

EXTRA WHITE

THE VALUE OF
THE PASSING OF TIME

Con todos los esfuerzos tecnológicos concentrados en nuevas formulaciones de esmaltes, podemos ofrecer el blanco cerámico más puro hasta la fecha, que cuenta además con una suavidad incomparable.

Se trata del acabado Extrawhite presente en las colecciones ICE y COTTON. Los espacios se tornan más luminosos, neutros y confortables aportando así el valor diferencial que continuamente ofrecen nuestros productos, resultado de nuestra conocida pasión por el detalle.

Thanks to the technological efforts we channel into finding new glaze formulae, we have come up with the most ultra-white tile finish to date, with the added benefit of an unparalleled smooth surface.

This is our Extrawhite finish, available in the ICE and COTTON collections. Extrawhite infuses settings with a more luminous, neutral, comfortable appearance, lending them that singular appeal that all our products offer, thanks to Peronda's well-known passion for detail.

smoooooth

SOFT

THE SMOOTHEST
ONE

SUAVE, SEDOSO Y FÁCIL DE LIMPIAR

El acabado SOFT es la perfecta elección para hacer de cualquier espacio un lugar más confortable. Gracias a su material sedoso, ofrece una superficie de extrema suavidad muy fácil de limpiar, pues impide que la suciedad se adhiera.

El broche para tu vivienda
o local comercial.

SMOOTH, SILKY AND EASY TO CLEAN

SOFT is a finish conceived to bring added comfort and convenience to settings of all kinds. Thanks to its silky feel, this is a very smooth, easy-to-clean surface since it prevents the build-up of dirt.

The perfect crowning touch
to homes or commercial premises!

LO MÁS ROBUSTO DE PERONDA

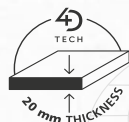

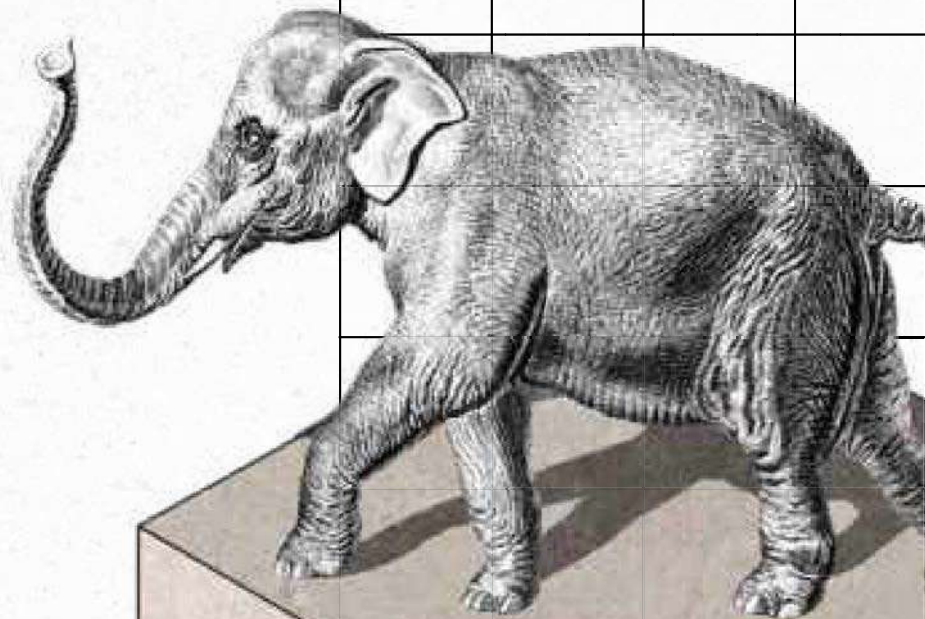

La última tecnología en producción cerámica se materializa en 20 mm, el porcelánico de mayor espesor con todos los beneficios de 4D Tech en el producto más robusto de Peronda.

MAYOR ESPESOR SIN COSTILLA

Somos pioneros en producir piezas de este espesor con prensa continua. Además de todas las características de un producto 4D, 20 mm permite la ausencia de costilla en la pieza.

RESISTENCIA EXTRAORDINARIA

La base plana del 20 mm ofrece un total contacto con la superficie de soporte. Sobre plots u otro material, el resultado es más resistente, pues toda la pieza absorbe el impacto.

20MM

EXTRAORDINARY
RESISTANCE

PERONDA'S MOST ROBUST

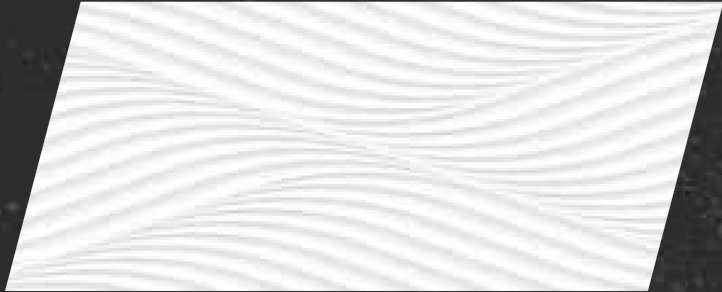

The latest technology in ceramic production becomes a reality in 20 mm. The thickest porcelain with all the benefits of 4D Tech in Peronda's most robust product.

THICKER WITHOUT RIBBING

We are pioneers in producing pieces of this thickness with continuous press. Besides all the features of a 4D product, 20 mm allows for the lack of ribbing.

EXTRAORDINARY RESISTANCE

The flat base of 20 mm offers complete contact with the supporting area. Be it on plots or any other material, it is more resistant since the whole piece absorbs the impact.

PERONDA ONLINE EXPLORE

Peronda expands its digital ecosystem to offer a more fluid and accessible way to discover its collections. The new website enhances navigation, makes it easier to access products and allows you to explore spaces and colour palettes with greater freedom, supported by more realistic visualisations.

This experience is extended through our social media channels, where we continuously share new releases, trends and inspiration, creating a dynamic and ever-evolving space.

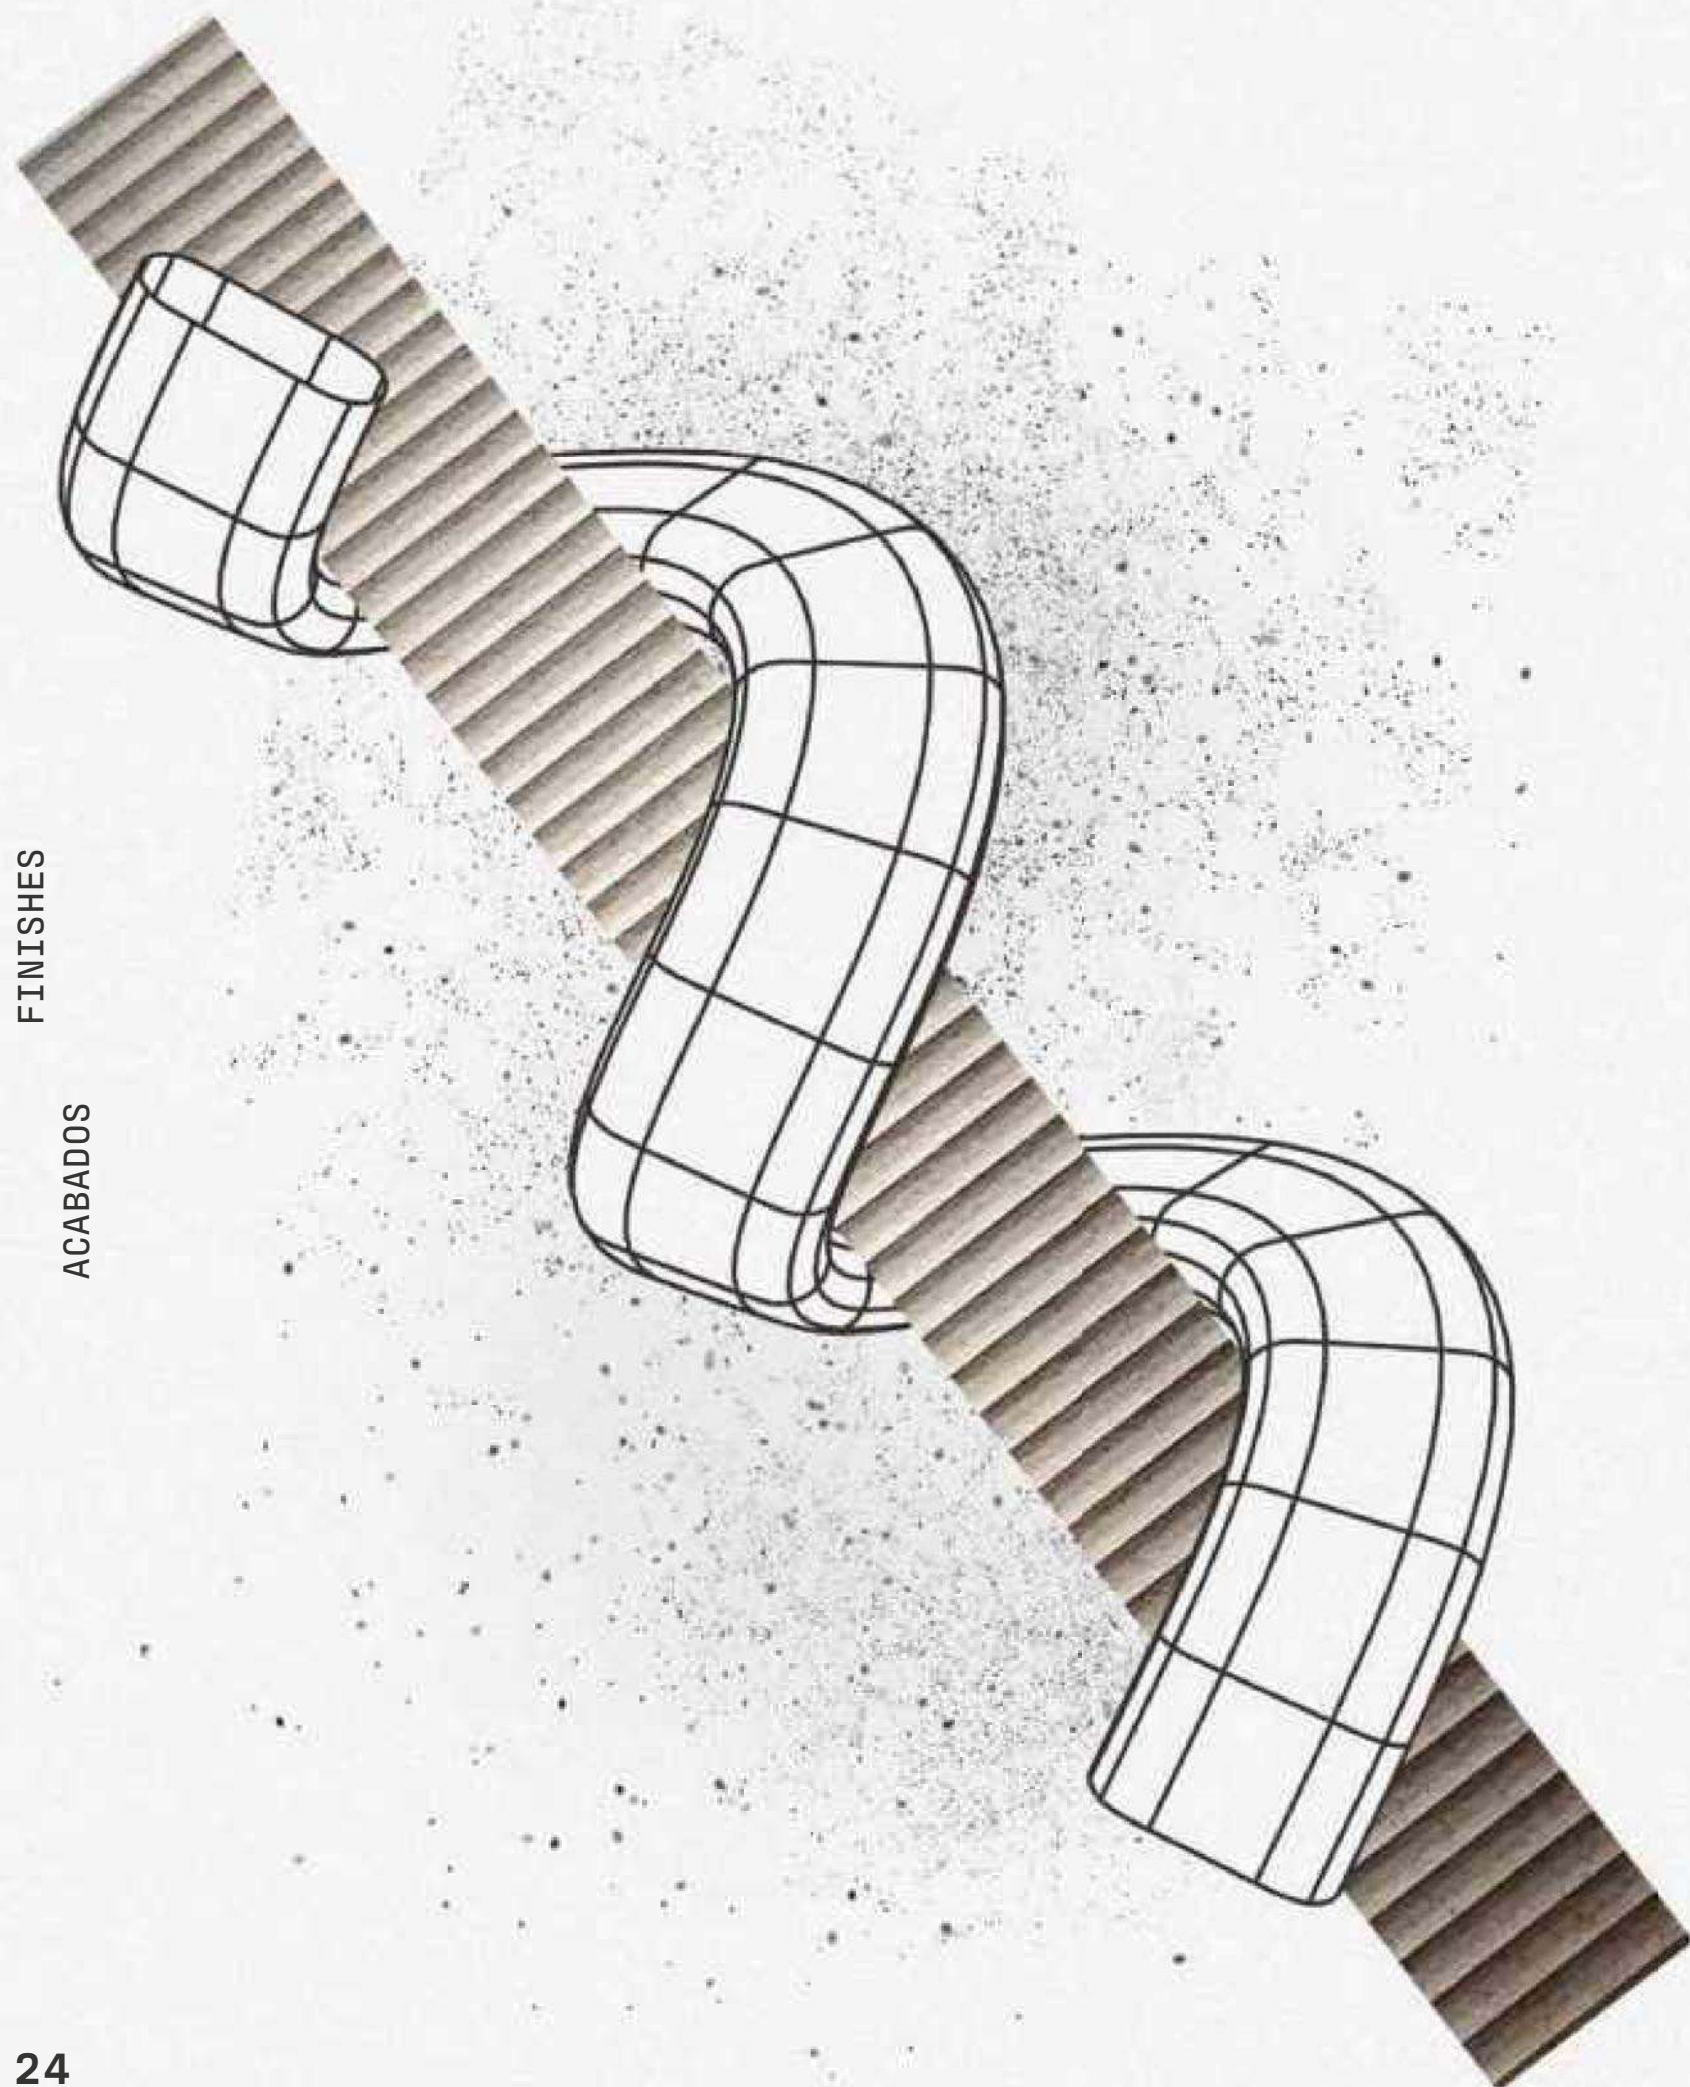

Keep exploring and stay connected to discover what's coming next.

FINISHES

ACABADOS

STRATA
_ST

Strata Tech fusiona tecnologías en capas para crear superficies cerámicas de gran realismo y precisión. La combinación de relieve y textura genera profundidad visual y nuevas posibilidades en diseño interior.

Strata Tech fuses layered technologies to create ceramic surfaces with a high degree of realism and precision. The combination of relief and texture generates visual depth and opens up new possibilities in interior design.

SHAPED
_SP

Relieves creados de manera digital perfectamente coordinados con la impresión gráfica para generar las piezas más naturales nunca vistas en cerámica.

Relieves created digitally, perfectly coordinated with the graphic printing to generate the most natural pieces ever seen in ceramics.

SHARP

Sharp Tech redefine la precisión en el diseño cerámico. Relieves de alta definición que llevan la nitidez y el detalle a un nuevo nivel.

Sharp Tech redefines precision in ceramic design. High-definition reliefs that take sharpness and detail to a new level.

ALL IN ONE
_AS

Usos ilimitados, misma superficie. El acabado All in one aúna suavidad y antideslizamiento. Puedes tenerlo todo en un único producto.

Unlimited purposes, same surface. All in one finish brings softness and anti slip treatment together. You can have it all in just one product.

LAYER TECH
_LT

Última tecnología de decoración cerámica, que permite crear texturas en diferentes capas de la superficie de manera digital.

The latest in tile printing technology. With it, textures can be created on different surface layers in a digital way.

DEEP TECH
_DT

Permite realizar relieves con un nivel de profundidad extraordinario, llegando hasta los 8 mm de relieve.

Relief surfaces can be created with an extraordinary depth, with reliefs as deep as 8 mm.

EXTRAWHITE

Gracias a los esfuerzos tecnológicos concentrados en nuevas formulaciones de esmaltes, podemos ofrecer el blanco cerámico más puro hasta la fecha.

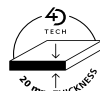

Thanks to the technological efforts we channel into finding new glaze formulae, we have come up with the most ultra-white tile finish to date.

SOFT
_SF

Acabado suave y sofisticado en superficies mates de fácil limpieza que enfatiza el detalle del producto.

A soft sophisticated matt finish, conceived to enhance the features of the tile design, on an easy-to-clean surface.

20MM

Porcelánico espesorado realizado con la última tecnología en producción. Todos los beneficios de 4D Tech al servicio del producto más robusto de Peronda.

20 mm thick porcelain made with the latest technology in ceramic production. All the benefits of 4D Tech at the service of Peronda's most robust product.

NATURAL
_NT

Acabado inherente al producto cerámico cuidando los atributos naturales del mismo para potenciar el detalle de su gráfica.

The tile's natural finish, conserving all its natural characteristics so as to enhance the details of its pattern.

LAPADO
_LA

Superficies semipulidas que aportan brillo natural a cualquier tipo de espacio.

A semi-polished surface that brings a natural shine to all settings where it is used.

ANTISLIP
_A

Porcelánicos de aspecto mate y una delicada textura con características antideslizante.

Matt porcelain tiles with a delicate texture and non-slip grip.

BUSH HAMMERED
_BHMR

Suave relieve que confiere textura en superficies de aspecto mate y tacto único.

A matt surface with a gentle relief texture and unique feel.

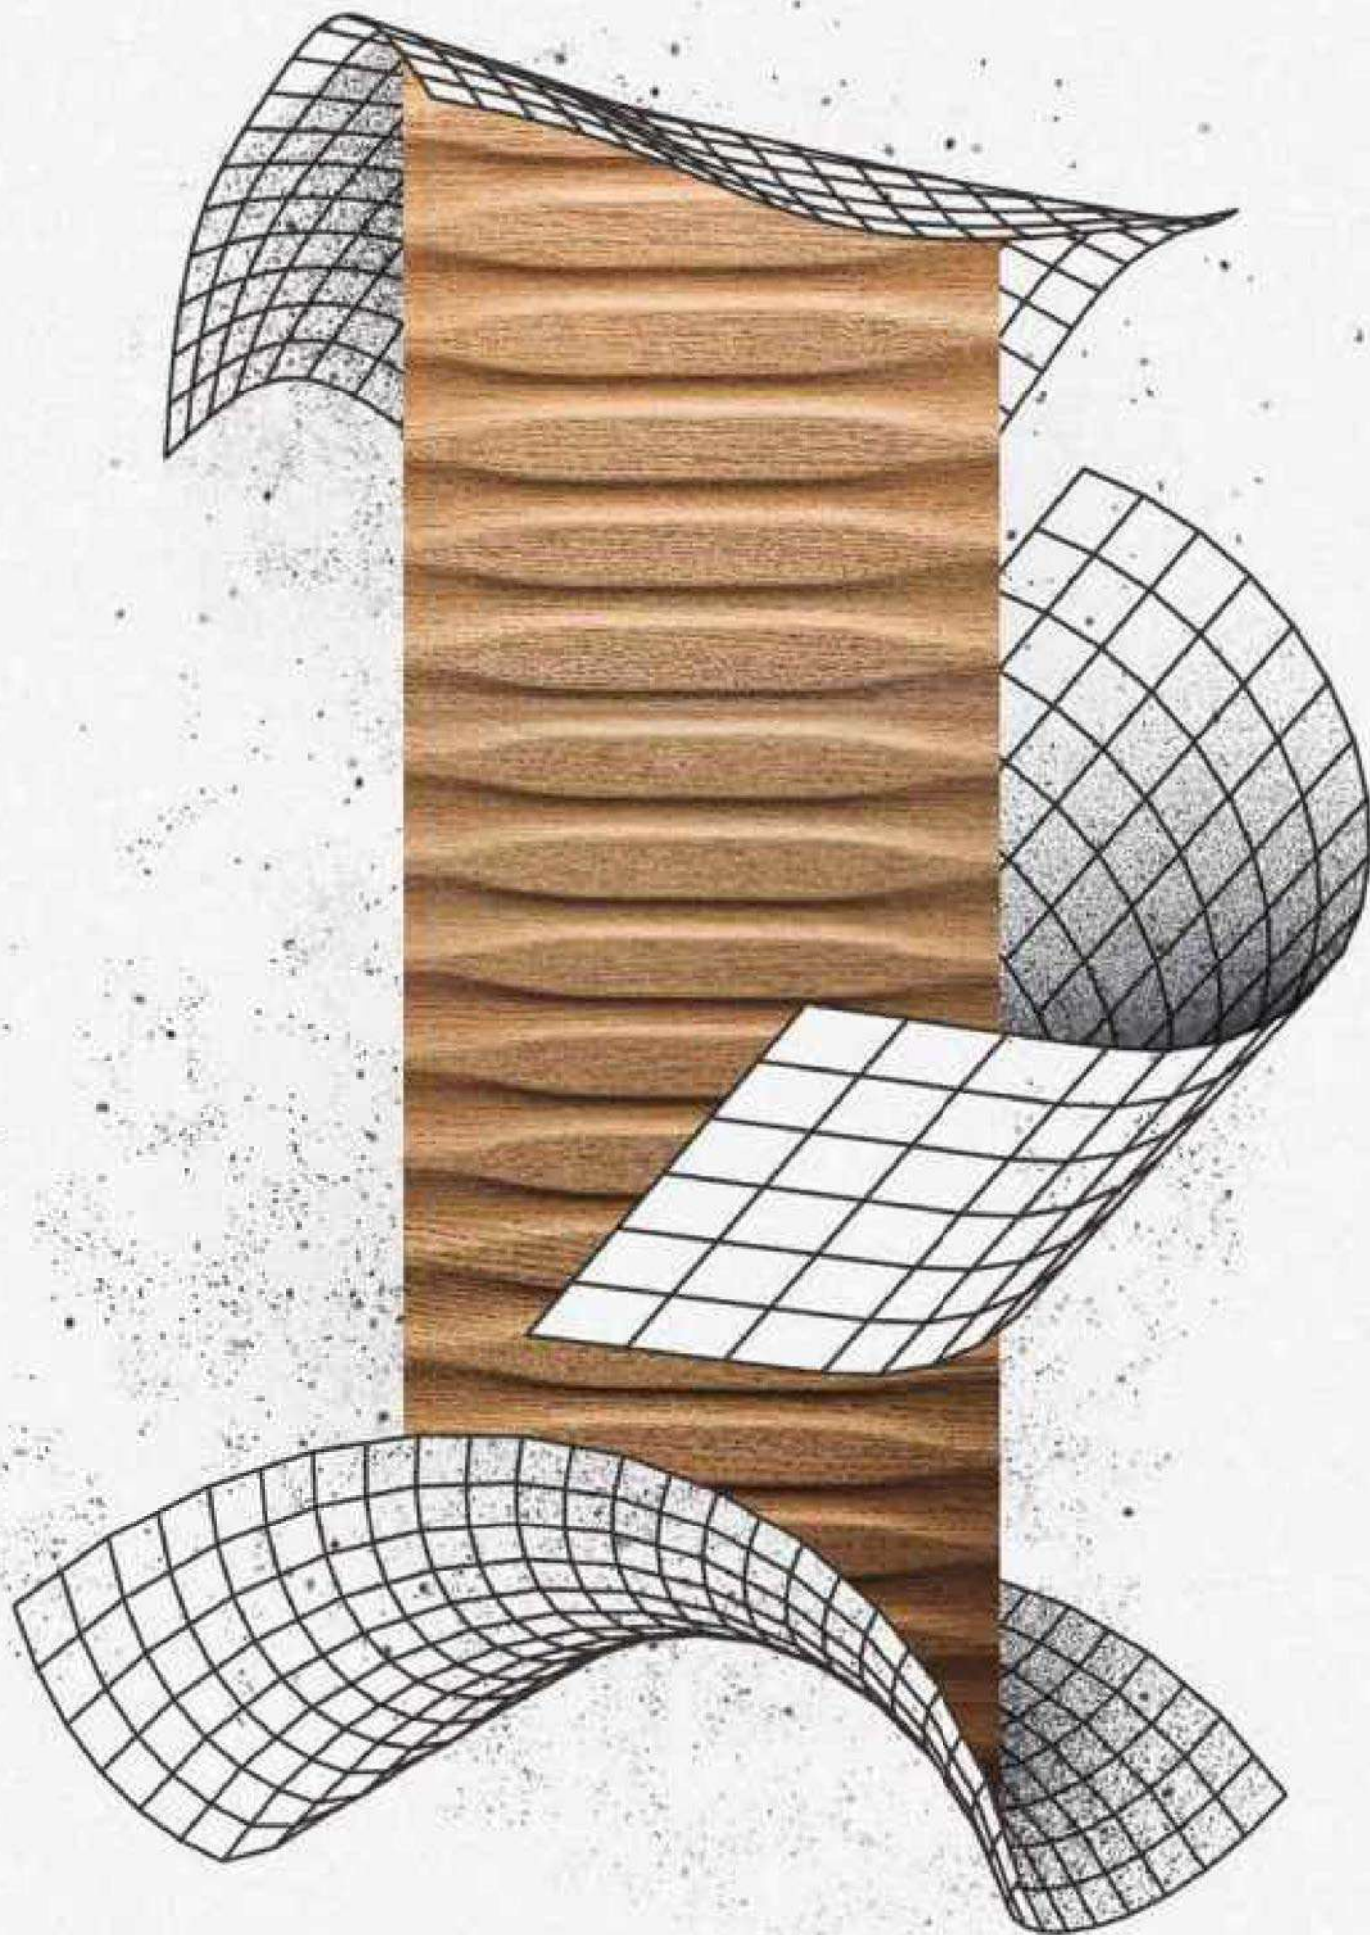

ANTISLIP BUSH
HAMMERED _ABHMR

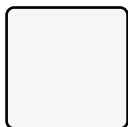

Porcelánico antideslizante con rugosidad imperceptible al tacto.

Non-slip porcelain tiles, with a roughness imperceptible to the touch.

OMNI WALL

UNA RUTA QUE CONECTA
PORCELÁNICO Y REVESTIMIENTO
BAJO UN MISMO LENGUAJE.

ETAPE ONE reúne LEMANS, AVIGNON y LOIRE en un recorrido concebido para construir proyectos con continuidad entre suelo y pared.

LEMANS, desarrollado en porcelánico, parte de una gráfica de arenisca abujardada y amplía sus posibilidades a través de distintos formatos, acabados y los tonos Sand, Bone y Bourbon.

AVIGNON propone una lectura crosscut más concentrada, también en porcelánico, donde Strata Tech potencia la presencia de la materia y permite que la textura adquiera una profundidad especialmente expresiva en Sand y Bone.

LOIRE completa la propuesta desde el revestimiento 33x100, compartiendo los tonos Sand y Bone para coordinarse con ambas colecciones y reforzar la conexión visual del conjunto. Sus versiones Fluted y Carved introducen relieve en la pared sin romper la unidad del proyecto.

ETAPE ONE convierte la piedra en un sistema coherente, pensado para avanzar de una superficie a otra.

A JOURNEY THAT CONNECTS
PORCELAIN AND WALL TILES THROUGH
ONE SHARED DESIGN LANGUAGE.

ETAPE ONE brings together LEMANS, AVIGNON and LOIRE in a journey designed to create continuity between floors and walls.

LEMANS, developed in porcelain stoneware, is based on a bush-hammered sandstone graphic and expands its possibilities through different formats and finishes, available in Sand, Bone and Bourbon.

AVIGNON offers a more focused crosscut interpretation, also in porcelain stoneware, where Strata Tech enhances the material presence of the surface and gives the texture a deeply expressive depth in Sand and Bone.

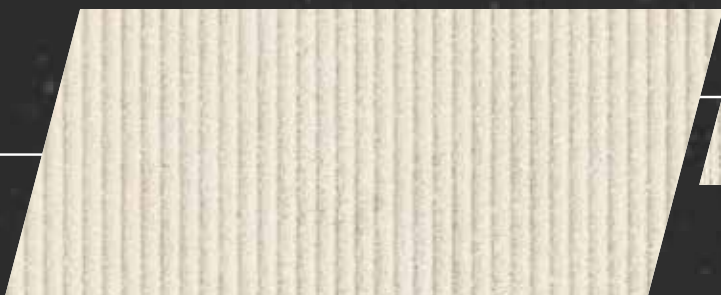

LOIRE completes the proposal as a 33x100 wall tile collection, sharing Sand and Bone tones to connect naturally with both porcelain ranges. Its Fluted and Carved surfaces introduce relief on the wall without breaking the unity of the project.

ETAPE ONE turns stone into a coherent system, made to move from one surface to another.

UN REVESTIMIENTO UNIVERSAL
PARA ACOMPAÑAR DISTINTOS
TIPOS DE SUELO

THE OMNI COLLECTION nace para ampliar las posibilidades del revestimiento dentro del catálogo de Peronda.

Su formato 60x120 en pasta blanca introduce una nueva escala para pared, pensada para acompañar proyectos muy distintos sin condicionar la elección del suelo.

La colección se desarrolla en los tonos Bone y Sand, con una gráfica suave concebida para combinarse con cualquier suelo de Peronda, desde las colecciones pétreas hasta las maderas cerámicas o las superficies inspiradas en cemento.

Cada tono incorpora distintas opciones de relieve, permitiendo que la pared adquiera más presencia o se mantenga como una base serena dentro del espacio.

Su carácter universal convierte la colección en una solución de revestimiento abierta, capaz de adaptarse a distintas colecciones y formas de proyectar.

THE OMNI COLLECTION

SOON
COMING

A WALL FOR
EVERY SURFACE

A UNIVERSAL WALL COVERING
DESIGNED TO ACCOMPANY DIFFERENT
TYPES OF FLOORING

THE OMNI COLLECTION was created to expand the possibilities of wall coverings within the Peronda catalogue.

Its 60x120 white body format introduces a new scale for walls, designed to accompany very different projects without conditioning the choice of flooring.

The collection is developed in Bone and Sand tones, with a soft graphic conceived to be combined with any Peronda floor, from stone collections to ceramic woods or concrete inspired surfaces.

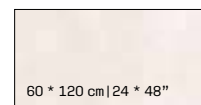

Each tone includes different relief options, allowing the wall to take on greater presence or remain as a serene base within the space.

Its universal character turns the collection into an open wall covering solution, capable of adapting to different collections and ways of designing.

COMPLEMENTARY PIECE

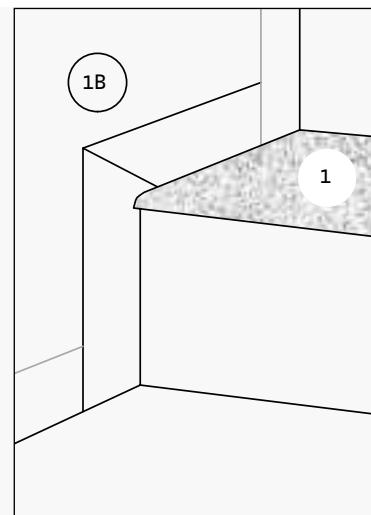

1. PELDAÑO ROMO

ROUNDED STAIR - TREAD (PR)

30 * 100 cm | 12 * 39" P85
30 * 151 cm | 12 * 59" P54
30 * 120 cm | 12 * 48" P77
30 * 90 cm | 12 * 36" P61
30 * 60 cm | 12 * 24" P64

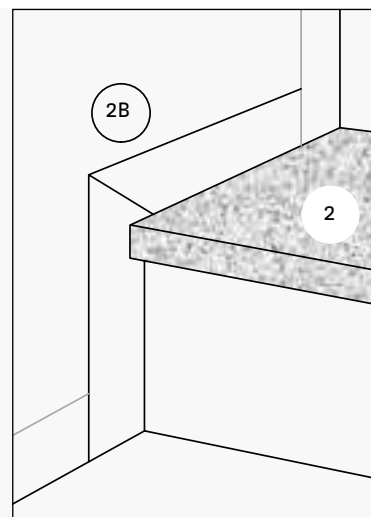

2. PELDAÑO TÉCNICO FRONTAL

FRONTAL TECHNICAL STAIR-TREAD (PTF)

30 * 100 cm | 12 * 39" P76
30 * 151 cm | 12 * 59" P75
30 * 120 cm | 12 * 48" P74
0 * 90 cm | 12 * 36" P70
30 * 60 cm | 12 * 24" P87

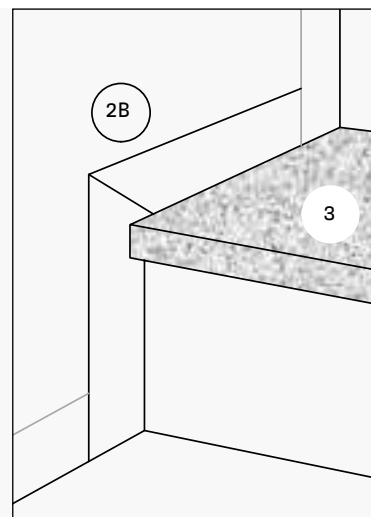

3. PELDAÑO TÉCNICO DOBLE

DOUBLE TECHNICAL STAIR-TREAD (PT)

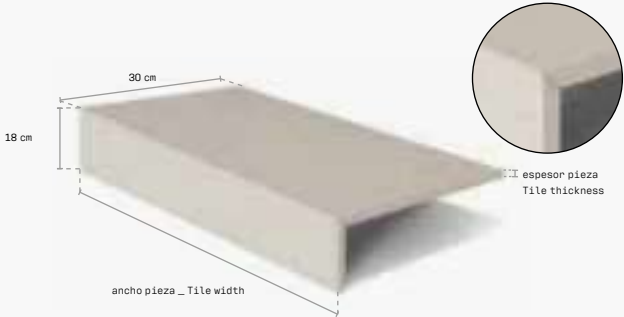

30 * 100 cm | 12 * 39" P74
30 * 151 cm | 12 * 59" P80
30 * 120 cm | 12 * 48" P75
30 * 90 cm | 12 * 36" P76
30 * 60 cm | 12 * 24" P54

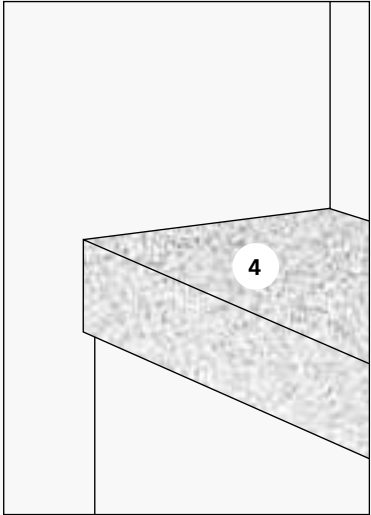

Los tamaños de las piezas complementarias estarán determinados por los tamaños de las piezas de la colección. Esto significa que cada pieza complementaria será diseñada y fabricada para coincidir perfectamente con las dimensiones de las piezas principales de la colección

4. PELDAÑO TÉCNICO SIMPLE

SEAMLESS TECHNICAL STAIR - TREAD (PL)

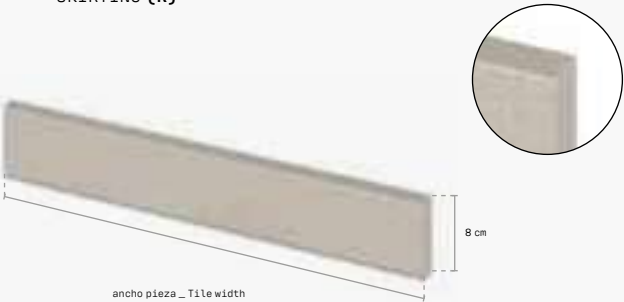

- 30 * 100 cm | 12 * 39" P74
- 30 * 151 cm | 12 * 59" P80
- 30 * 120 cm | 12 * 48" P75
- 30 * 90 cm | 12 * 36" P76
- 30 * 60 cm | 12 * 24" P54

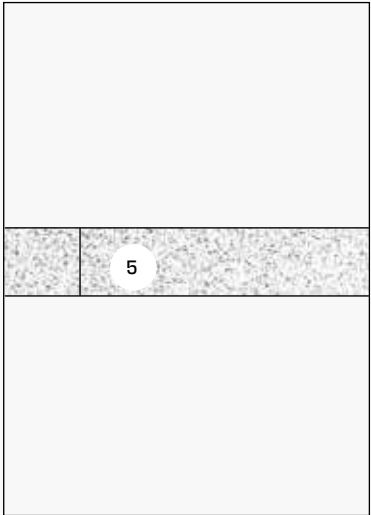

5. RODAPIE

SKIRTING (R)

- 8 * 120 cm | 3 * 48" P49
- 8 * 100 cm | 3 * 39" P45
- 8 * 90 cm | 3 * 36" P44
- 8 * 75,5 cm | 3 * 30" P43
- 8 * 60 cm | 3 * 24" P34
- 8 * 45 cm | 3 * 18" P29

1B. ZANQUÍN ROMO

SKIRTING PIECES ROUNDER STAIR-TREAD

Z.R.I.

Z.R.D.

8 * 30 CM | 3 * 12" P55

2B. ZANQUÍN ANGULAR

SKIRTING PIECES DOBLE TECHNICAL STAIR-TREAD

S.K.I.

S.K.D.

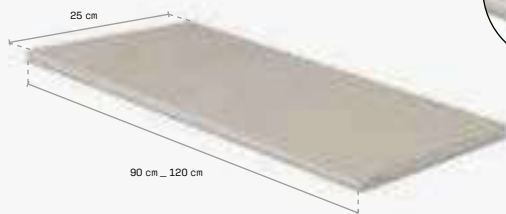

8 * 30 cm | 3 * 12" P55

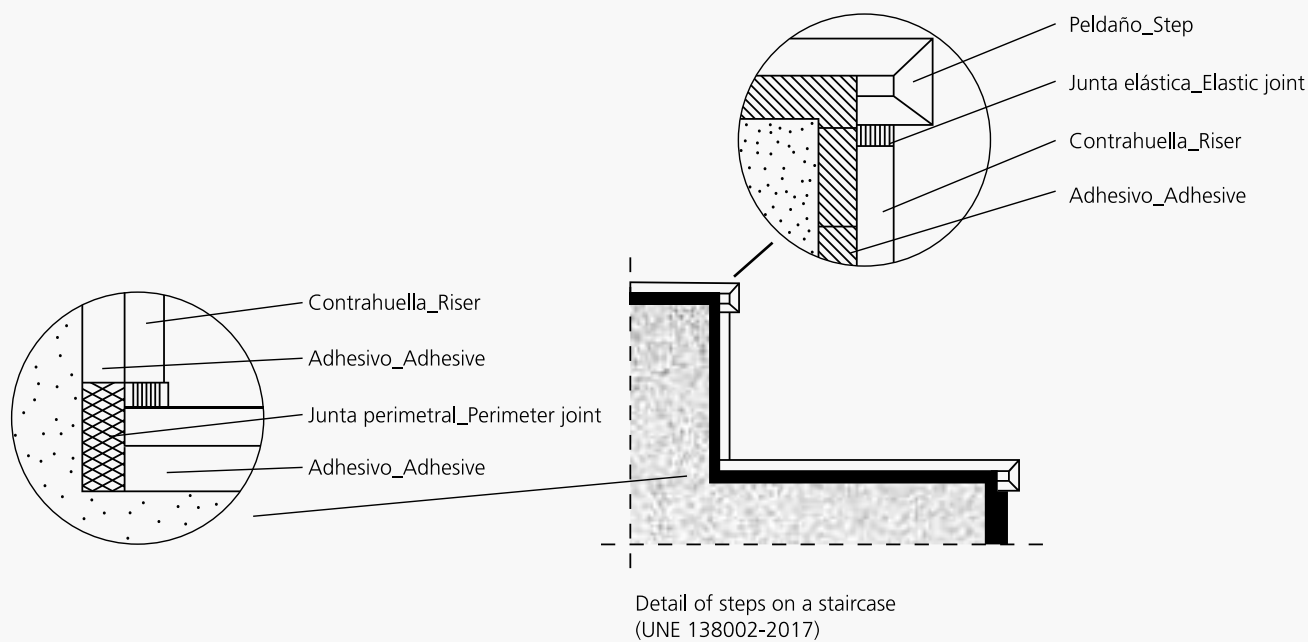

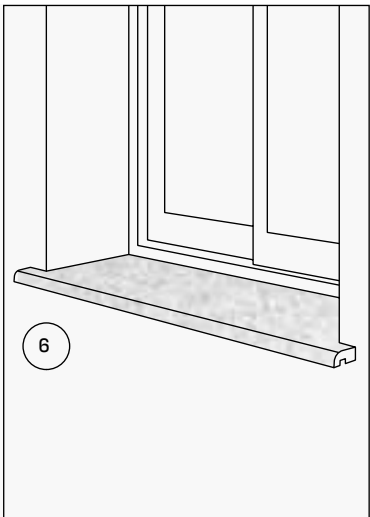

The sizes of the complementary pieces will be determined by the sizes of the pieces in the collection. This means that each complementary piece will be designed and manufactured to perfectly match the dimensions of the main pieces in the collection.

6. ALFÉIZAR

WINDOWSILL (AF)

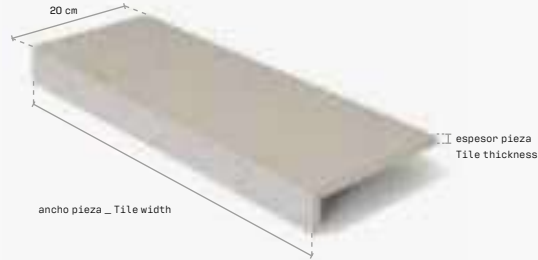

25 * 90 cm | 10 * 36" P77
25 * 100 cm | 10 * 39" P79
25 * 120 cm | 10 * 48" P54

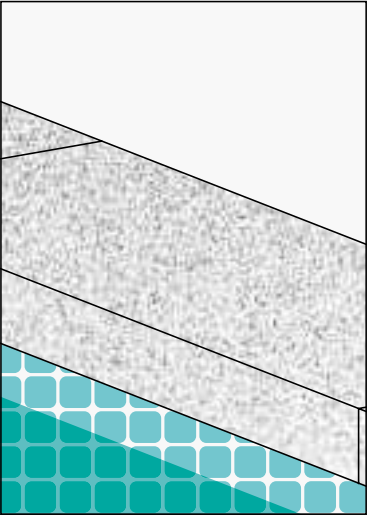

Los tamaños de las piezas complementarias estarán determinados por los tamaños de las piezas de la colección. Esto significa que cada pieza complementaria será diseñada y fabricada para coincidir perfectamente con las dimensiones de las piezas principales de la colección

1. PELDAÑO VIERTEAGUA

POOL COPING (PV)

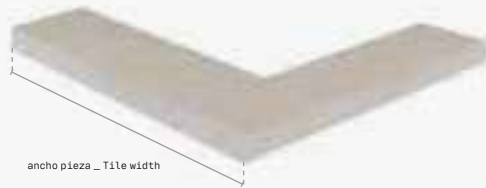

- 20 * 120 cm | 8 * 48" P70
- 20 * 100 cm | 8 * 39" P82
- 20 * 100 * 2 cm | 8 * 39" P82
- 20 * 90 cm | 8 * 36" P81
- 20 * 60 cm | 8 * 24" P61

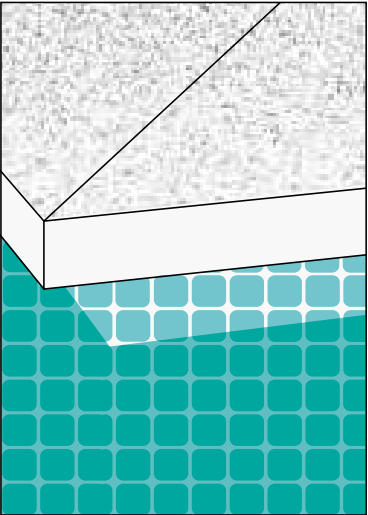

2. PELDAÑO VIERTEAGUA ESQUINA

POOL COPING EXTERNAL CORNER (EPV)

- 20 * 120 cm | 8 * 48" P86
 - 20 * 100 cm | 8 * 39" P80
 - 20 * 100 * 2 cm | 8 * 39" P86
 - 20 * 90 cm | 8 * 36" P75
 - 20 * 60 cm | 8 * 24" P70
- (PACK 2 units)

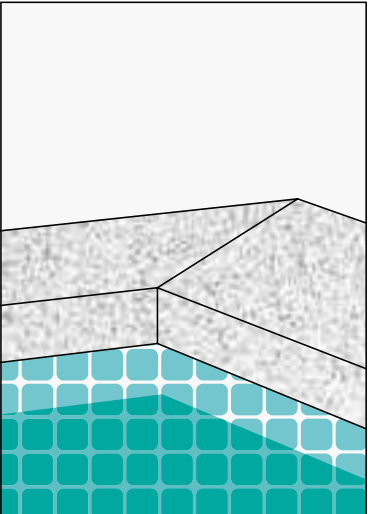

3. PELDAÑO VIERTEAGUA ÁNGULO

POOL COPING INTERNAL CORNER (ANG.PV)

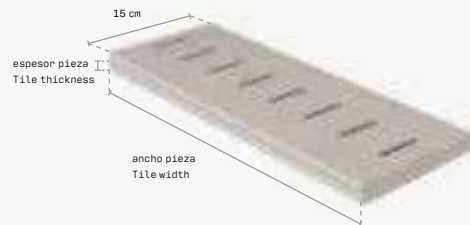

- 20 * 120 cm | 8 * 48" P86
 - 20 * 100 cm | 8 * 39" P80
 - 20 * 100 * 2 cm | 8 * 39" P86
 - 20 * 90 cm | 8 * 36" P75
 - 20 * 60 cm | 8 * 24" P70
- (PACK 2 units)

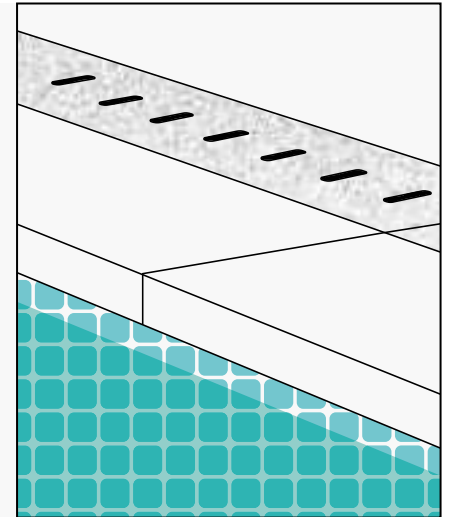

The sizes of the complementary pieces will be determined by the sizes of the pieces in the collection. This means that each complementary piece will be designed and manufactured to perfectly match the dimensions of the main pieces in the collection.

4. REJILLA

DRAINAGE GRATE (REJ)

15 * 60 * 1,8 cm | 6 * 24" P54
15 * 90 * 1,8 cm | 6 * 36" P76
15 * 50 * 1,6 cm | 6 * 20" P87

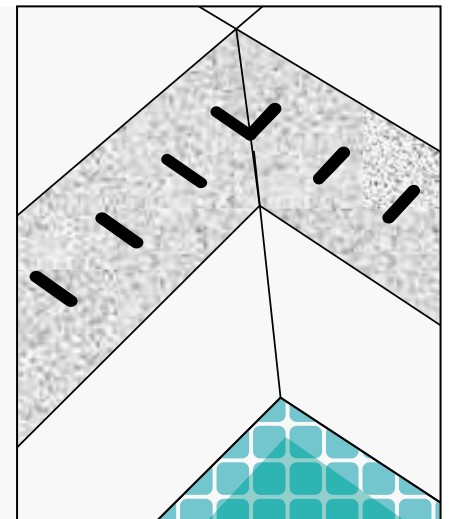

5. ÁNGULO REJILLA

ANGLE CORNER DRAINAGE GRATE (ANG.REJ)

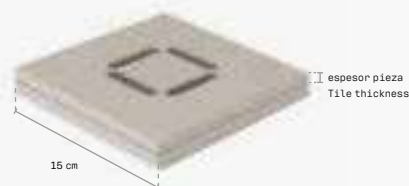

15 * 60 * 1,8 cm | 6 * 24" P75
15 * 90 * 1,8 cm | 6 * 36" P57
15 * 50 * 1,6 cm | 6 * 20" P74
[PACK 2 units]

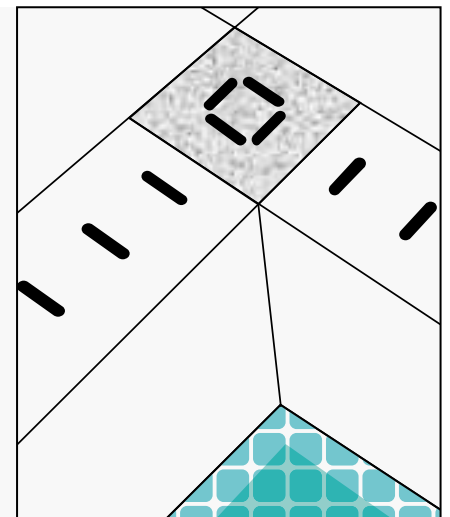

6. TACO REJILLA

SQUARE CORNER DRAINAGE GRATE (T.REJ)

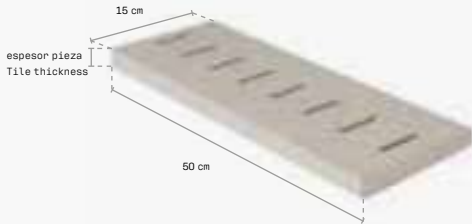

15 * 15 * 1,8 cm | 6 * 6" P71
15 * 15 * 1,6 cm | 6 * 6" P71

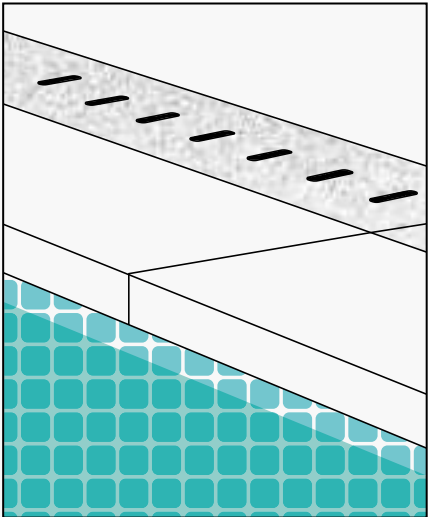

Los tamaños de las piezas complementarias estarán determinados por los tamaños de las piezas de la colección. Esto significa que cada pieza complementaria será diseñada y fabricada para coincidir perfectamente con las dimensiones de las piezas principales de la colección

4. REJILLA 20 MM

DRAINAGE GRATE (REJ)

15 * 50 * 2 cm | 6 * 20" P54

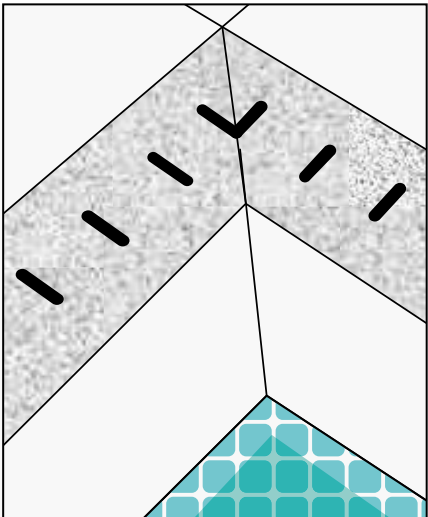

5. ÁNGULO REJILLA 20 MM

ANGLE CORNER DRAINAGE GRATE (ANG.REJ)

15 * 50 * 2 cm | 6 * 20" P86
(PACK 2 units)

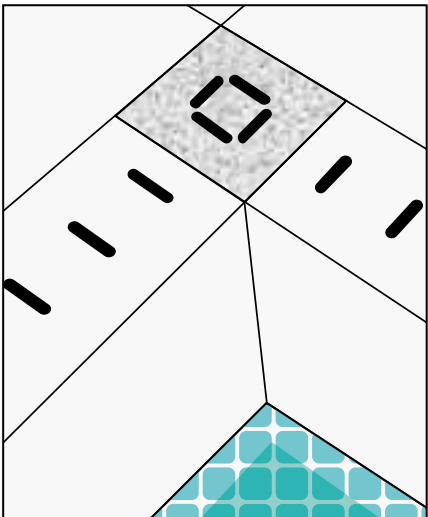

6. TACO REJILLA 20 MM

SQUARE CORNER DRAINAGE GRATE (T.REJ)

15 * 15 * 2 cm | 6 * 6" P71

The sizes of the complementary pieces will be determined by the sizes of the pieces in the collection. This means that each complementary piece will be designed and manufactured to perfectly match the dimensions of the main pieces in the collection.

INFORMACIÓN TÉCNICA

La norma UNE-EN 14411 establece las características técnicas y los requisitos que deben cumplir las baldosas cerámicas para ser utilizadas como pavimento de suelos y revestimiento de paredes. Asimismo, hace referencia a los métodos de ensayo (normas ISO 10545) aplicables para determinar las características incluidas en esta norma y verificar si cumplen o no con los requisitos establecidos.

Para la aplicación de esta norma y para determinar los requisitos para el cumplimiento de las características definidas, las baldosas se dividen en grupos en función de la absorción de agua que presenten:

Baldosas cerámicas prensada en seco con una absorción de agua	
$E_b \leq 0.5\%$	Grupo BIa
$0.5\% < E_b \leq 3\%$	Grupo BIb.
$3\% < E_b \leq 6\%$	Grupo BIIa
$E_b > 10\%$	Grupo BIII.

RESISTENCIA AL DESLIZAMIENTO

En la actualidad, no se dispone de un método de ensayo consolidado para determinar la resistencia al deslizamiento. Existen varios métodos de ensayo:

1.- NORMA UNE 41901 EX EN HÚMEDO

En España, el CTE (Código Técnico de la Edificación) establece las exigencias básicas de seguridad que deben cumplir los suelos en función de su localización y características. El Documento Básico Seguridad de Utilización y Accesibilidad (DB SUA), Sección SUA-1 Seguridad frente al riesgo de caídas, define los requisitos de resistencia al deslizamiento que deben cumplir los suelos de los edificios de uso residencial, público, sanitario, docente, comercial, administrativo y pública concurrencia conforme a su resistencia al deslizamiento Rd.

Los suelos se clasifican en cuatro grupos en función de su resistencia al deslizamiento:

Resistencia al deslizamiento Rd	Clase
$R_d < 15$	0
$15 < R_d < 35$	1
$35 < R_d < 45$	2
$R_d > 45$	3

El valor de Rd se determina mediante el ensayo del péndulo descrito en la norma de ensayo UNE 41901 EX.

En la siguiente tabla se describe la clase exigible que deben tener los suelos en función de su localización:

ZONA	CLASE
Zonas interiores secas	
Superficies con pendiente menor del 6%	1
Superficies con pendiente igual o mayor que el 6% y escaleras	2
Zonas interiores húmedas, tales como entradas a los edificios desde el exterior (1), terrazas cubiertas, baños, cocinas, etc	
Superficies con pendiente menor del 6%	2
Superficies con pendiente igual o mayor que el 6% y escaleras	3
Zonas interiores donde, además de agua, pueda haber agentes (grasas, lubricantes, etc.) que reduzcan la resistencia al deslizamiento, tales como cocinas industriales, mataderos, aparcamientos, zonas de uso industrial, etc.	3
Zona exterior	
Exterior descubierto	3
Piscinas (2)	3

(1) Excepto cuando se trate de accesos directos de uso restringido.

(2) En zonas previstas para usuarios descalzos y en el fondo de los vasos, en las zonas en las que la profundidad no exceda de 1,50 m.

2.-NORMA BS 7976-2

En Reino Unido, diferentes asociaciones y organismos han planteado una clasificación de la seguridad de los suelos en función de la resistencia al deslizamiento. Esta resistencia se basa en determinar el valor del PTV (Pendulum Test Value) mediante el ensayo del péndulo descrito en la norma BS 7976-2. Según el valor del PTV tendremos:

PTV 96	Riesgo potencial de deslizamiento
< 24	alto
24 - 35	moderado
36 - 64	bajo
> 65	muy bajo

Para valores de PTV $\geq +36$, los suelos se declaran con bajo riesgo de deslizamiento.

3.-NORMA DIN 51130 Y DIN 51097

Las normas alemanas DIN 51130 y DIN 51097 realizan una clasificación de los suelos en función de su resistencia al deslizamiento de acuerdo con el método de ensayo de la rampa:

DIN 51130 – Método de la rampa para pies calzados. Establece una clasificación R en función del ángulo de inclinación que varía de R9 a R13, siendo R9 el menor valor, definido como baja resistencia al deslizamiento.

Ángulo de inclinación medio (°)	Resistencia al deslizamiento
6° ≤ α ≤ 10°	R9
10° ≤ α ≤ 19°	R10
19° ≤ α ≤ 27°	R11
27° ≤ α ≤ 35°	R12
35° < α	R13

En función del valor de R o de resistencia al deslizamiento, se recomiendan los siguientes usos para los suelos:

Resistencia Deslizamiento	Descripción	Recomendado para
R9	Riesgo alto deslizamiento	Zonas interiores secas incluidas las entradas interiores. No utilizar en zonas exteriores.
R10	Riesgo moderado deslizamiento	Zonas interiores secas que están sujetas a humectación ocasional como baños o garajes.
R11	Riesgo bajo deslizamiento	Zonas externas y zonas húmedas incluidos los entornos industriales y entradas a los edificios de tipo residencial o públicos.
R12	Riesgo bajo deslizamiento	Zonas externas y zonas húmedas como entradas desde el exterior, caminos, aparcamientos, piscinas. En zonas interiores en cocinas profesionales, duchas.
R13	Riesgo bajo deslizamiento	Zonas externas y zonas muy húmedas como piscinas, parques acuáticos. También en zonas industriales que se trabaje con líquidos. Zonas de alto riesgo en resbalarse.

DIN 51097 - Método de la rampa para pies descalzos. La resistencia al deslizamiento se clasifica como A, B o C siendo A el menor valor.

Ángulo de inclinación medio (°)	Resistencia al deslizamiento
≥ 12°	A
≥ 18°	B
≥ 24°	C

En función del valor de la resistencia al deslizamiento, se recomiendan los siguientes usos para suelos:

Resistencia Deslizamiento	Descripción	Adecuado para
A	Riesgo alto deslizamiento	Zonas secas de pies descalzos
B	Riesgo moderado deslizamiento	Zonas de playa de piscinas y duchas
C	Riesgo bajo deslizamiento	Zonas de rampas húmedas, suelos de piscinas y suelos de jacuzzis.

4.-NORMA ANSI A 137.1

El DCOF (Coeficiente de fricción dinámico) es una medida de la resistencia al deslizamiento que se realiza con un tribómetro BOT-3000 según el método descrito en la norma ANSI A 137.1 del Instituto Nacional Estadounidense de Estándares (ANSI).

Según esta norma, los suelos interiores sobre los que se prevé que se camine mientras están húmedos deben de tener un valor mínimo de DCOF>0.42. Los suelos que no cumplan con este valor de DCOF no están limitados a colocarse en zonas secas sino en suelos que se mantengan secos mientras se camina.

RESISTENCIA A LA ABRASIÓN

1.- ISO 10545-7

Para baldosas cerámicas destinadas al revestimiento de suelos, el ensayo se realiza según la metodología definida en la norma ISO 10545-7. La norma UNE-EN 14411 establece la obligatoriedad de declarar la clase de abrasión y el número de revoluciones. Según esta misma norma, cuando se exija, se puede declarar la clase de abrasión según el Anexo N (informativo) que clasifica las baldosas cerámicas esmaltadas según la resistencia a la abrasión:

PEI 1	Uso residencial tráfico ligero
PEI 2	Uso residencial tráfico moderado
PEI 3	Uso comercial tráfico ligero
PEI 4	Uso comercial tráfico moderado
PEI 5	Uso comercial tráfico intenso

2.- ISO 10545-6

La Norma UNE-EN 14411 especifica una resistencia a la abrasión profunda mínima para todas las baldosas no esmaltadas (UGL), expresada como volumen máximo admisible de material exportado tras la conclusión del ensayo (en mm³).

El ensayo se realiza según la metodología definida en la norma ISO 10545-6. La norma UNE-EN 14411 establece un valor máximo de volumen de materia pérdida (expresada en mm³) para las baldosas no esmaltadas del Grupo B1a de 175 mm³.

TECHNICAL INFORMATION

The UNE-EN 14411 standard sets the technical characteristics and requirements that ceramic tiles must meet to be used as flooring and wall cladding. It also references the test methods (ISO 10545 standards) applicable for determining the characteristics included in this standard and verifying whether they comply with the established requirements.

For the application of this standard and to determine the requirements for compliance with the defined characteristics, tiles are divided into groups based on their water absorption:

Dry-pressed ceramic tiles with water absorption	
$E_b \leq 0.5\%$,	Grupo BIIa
$0.5\% < E_b \leq 3\%$	grupo BIIb.
$3\% < E_b \leq 6\%$,	Grupo BIIa
$E_b > 10\%$,	Grupo BIII.

SLIP RESISTANCE

Currently, there is no consolidated testing method to determine slip resistance. There are several testing methods:

1.- UNE 41901 EX WET EN METHOD

In Spain, the CTE (Código Técnico de la Edificación) establishes the basic safety requirements that floors must meet depending on their location and characteristics. The Basic Document on Use and Accessibility Safety (DB SUA), Section SUA-1 Safety against the risk of falls, defines the slip resistance requirements that floors in residential, public, health, educational, commercial, administrative, and public assembly buildings must meet according to their slip resistance Rd.

Slip Resistance Rd	Class
$R_d < 15$	0
$15 < R_d < 35$	1
$35 < R_d < 45$	2
$R_d > 45$	3

The value of Rd is determined by the pendulum test described in the testing standard UNE 41901 EX.

The following table describes the required class that floors must have depending on their location:

ZONE	CLASS
Dry indoor areas	
Surfaces with a slope less than 6%	1
Surfaces with a slope equal to or greater than 6% and stairs	2
Indoor wet areas, such as entrances to buildings from the exterior (1), covered terraces, bathrooms, kitchens, etc.	
Surfaces with a slope less than 6%	2
Surfaces with a slope equal to or greater than 6% and stairs	3
Indoor areas where, in addition to water, there may be agents (grease, lubricants, etc.) that reduce slip resistance, such as industrial kitchens, slaughterhouses, parking lots, industrial use areas, etc	3
Outdoor areas	
Uncovered outdoor	3
Pools (2)	3

(1) Except when they are direct accesses for restricted use.

(2) In areas intended for barefoot users and in the bottoms of pools where the depth does not exceed 1.50 meters.

2.-NORM BS 7976-2

In the United Kingdom, various associations and organizations have established a classification for floor safety based on slip resistance. This resistance is determined by measuring the Pendulum Test Value (PTV) using the pendulum test described in the BS 7976-2 standard. According to the PTV value, we have the following classifications:

PTV 96	Risk of Slipping
< 24	High
24 - 35	Moderate
36 - 64	Low
> 65	Very Low

For PTV values $\geq +36$, floors are declared to have a low risk of slipping.

3.-NORM DIN 51130 AND DIN 51097

The German standards DIN 51130 and DIN 51097 classify floors based on their slip resistance according to the ramp test method:

DIN 51130 – Ramp method for shod feet. It establishes an R classification based on the angle of inclination ranging from R9 to R13, with R9 being the lowest value, defined as low slip resistance.

Average incline angle (°)	Slip resistance
6° ≤ ° ≤ 10°	R9
10° ≤ ° ≤ 19°	R10
19° ≤ ° ≤ 27°	R11
27° ≤ ° ≤ 35°	R12
35° < °	R13

Depending on the R value or slip resistance, the following uses are recommended for floors:

Slip Resistance	Description	Recommended for
R9	High risk of slipping	Dry indoor areas including indoor entrances. Not recommended for outdoor areas.
R10	Moderate risk of slipping	Dry indoor areas subject to occasional moisture such as bathrooms or garages.
R11	Low risk of slipping	Outdoor areas and wet areas including industrial environments and entrances to residential or public buildings.
R12	Low risk of slipping	Outdoor areas and wet areas such as entrances from the exterior, pathways, parking lots, pools. In indoor areas like professional kitchens, showers.
R13	Low risk of slipping	Outdoor areas and very wet areas such as pools, water parks. Also in industrial areas where working with liquids. Areas with high risk of slipping.

DIN 51097 - Ramp method for barefoot feet. Slip resistance is classified as A, B, or C, with A being the lowest value.

Average incline angle (°)	Slip resistance
≥ 12°	A
≥ 18°	B
≥ 24°	C

Depending on the R value or slip resistance, the following uses are

Slip Resistance	Description	Suitable for
a	High risk of slipping	Dry areas for barefoot pedestrians
b	Moderate risk of slipping	Beach areas of pools and showers
c	Low risk of slipping	Wet ramp areas, pool floors, and jacuzzi floors

4. -NORMA ANSI A 137.1

The Dynamic Coefficient of Friction (DCOF) is a measure of slip resistance conducted using a BOT-3000 tribometer according to the method described in the ANSI A 137.1 standard from the American National Standards Institute (ANSI).

According to this standard, indoor floors expected to be walked on while wet must have a minimum DCOF value of >0.42. Floors that do not meet this

ABRASION RESISTANCE

1. -ISO 10545-7

For ceramic tiles intended for floor covering, the test is conducted according to the methodology defined in ISO 10545-7. The UNE-EN 14411 standard requires the declaration of the abrasion class and the number of revolutions. According to this standard, when required, the abrasion class can be declared according to Annex N (informative), which classifies glazed ceramic tiles according to their resistance to abrasion:

PEI 1	Residential use with light traffic
PEI 2	Residential use with moderate traffic
PEI 3	Commercial use with light traffic
PEI 4	Commercial use with moderate traffic
PEI 5	Commercial use with heavy traffic

2. -ISO 10545-6

The UNE-EN 14411 standard specifies a minimum resistance to deep abrasion for all unglazed tiles (UGL), expressed as the maximum allowable volume of material removed after the completion of the test (in mm³).

The test is conducted according to the methodology defined in ISO 10545-6. The UNE-EN 14411 standard establishes a maximum value of volume of material loss (expressed in mm³) for unglazed tiles of Group BIa as 175 mm³.

RECOMENDACIONES DE INSTALACIÓN

RECOMENDACIONES MANIPULACIÓN

_Manipular las piezas con guantes para evitar cortes por aristas o roturas accidentales.
_En piezas de gran formato, trasladar de una en una y con al menos dos operarios, salvo que se utilicen equipos específicos de elevación o ventosas.
_En baldosas rectificadas, extremar la manipulación para evitar golpes entre piezas y desconchados de canto.

RECEPCIÓN Y CONTROL PREVIO DEL MATERIAL

_Antes de colocar, comprobar que las baldosas están en perfecto estado y que la referencia recibida coincide con el pedido.
_Revisar tono, calibre, acabado, textura, relieve y posibles defectos visibles.
_No instalar piezas con defectos visibles. Una vez colocadas, la reclamación no será aceptada si el defecto era detectable antes de la instalación.
_Conservar etiquetas de caja, lote, tono y calibre hasta la finalización de la obra.

PREPARACIÓN DEL SOPORTE

_El soporte debe estar limpio, seco, estable, plano, sin polvo, grasa, pinturas, yesos, restos de mortero, sales o partes mal adheridas.
_En soportes recientes, respetar los tiempos de maduración y las condiciones de humedad antes de colocar.

SELECCIÓN DEL ADHESIVO

_La selección del adhesivo debe realizarse en función de la tipología de baldosa cerámica, su formato, absorción de agua, estabilidad dimensional, lugar de colocación, tipo de soporte y condiciones de uso prevista.
_De forma general, y salvo indicación específica en la documentación técnica del producto, se recomienda el uso de adhesivos cementosos mejorados tipo C2 como nivel mínimo de prestación para la colocación de baldosas cerámicas
_En piezas de gran formato, soportes sometidos a deformaciones, pavimentos con calefacción radiante, exteriores o zonas con cambios térmicos, se recomienda emplear adhesivos deformables, tipo S1 o S2 según la exigencia del sistema.

RECOMENDACIONES COLOCACIÓN

_La colocación debe realizarse por personal cualificado, sobre un soporte limpio, seco, estable, plano, cohesionado y libre de restos que puedan perjudicar la adherencia.
_En baldosas de pequeño formato, la colocación puede realizarse mediante la técnica de capa fina con adhesivo aplicado sobre el soporte con llana dentada adecuada.
_En baldosas de gran formato (superiores a 30x30), en exteriores o zonas húmedas, pavimentos de uso industrial y comercial, en revestimientos cerámicos con calefacción radiante, en revestimientos con láminas cerámicas de bajo espesor, se recomienda la técnica de doble encolado. Esta consiste en aplicar adhesivo tanto sobre el soporte como sobre el reverso de la baldosa, asegurando que toda la superficie de la cerámica esté en contacto con el adhesivo y el soporte.
_Se recomienda el uso de crucetas separadoras autonivelantes para evitar posibles desniveles de las baldosas, sobre todo en la colocación trabada y de grandes formatos.

JUNTAS DE COLOCACIÓN

_No se recomienda la colocación sin junta. Se recomienda juntas no inferiores a 1,5 mm en interiores y no inferiores a 5 mm en exteriores.
_En piezas rectificadas, aunque la junta pueda ser menor que en piezas no rectificadas, no debe eliminarse.
_Selección del material de rejuntado en base a la norma UNE 138002:

AMBIENTE DE DESTINO DEL REVESTIMIENTO CERÁMICO	
Condiciones de uso doméstico en recintos secos	CG1
Condiciones de uso doméstico en recintos húmedos	CG2W
Pavimentos y revestimientos exteriores	CG2WA
Condiciones que requieran estanquidad al agua y al vapor	RG
Condiciones de inmersión (piscinas, spa, balnearios...) con tratamiento de agua clorada	CG2WA/RG
Condiciones de inmersión (piscinas, spa, balnearios...) de elevada exigencia o con tratamiento de electrólisis salina o agua de mar	RG
Condiciones de altas exigencias mecánicas y/o químicas	RG
Condiciones de usos alimentarios y/o sanitarios	RG

_Antes de rejuntar, las juntas deben estar limpias, secas y sin restos de adhesivo, polvo o partículas sueltas.
_Retirar el sobrante en fresco con esponja húmeda, sin lavar en exceso la junta ni dejar velos endurecidos sobre la baldosa.

JUNTAS PERIMETRALES, ESTRUCTURALES, INTERMEDIAS Y DE COLOCACIÓN			
Tipo de junta	Ubicación	Función	Recomendación clave
Perimetral	Encuentro con paredes, pilares, carpinterías, cambios de plano	Absorber movimientos del pavimento frente a elementos fijos	No rellenar con material rígido: dejar aprox. 5-8 mm o criterio conservador $\geq$ 8 mm
Estructural	Coincide con juntas del edificio o soporte	Permitir movimientos de la estructura	Debe respetarse y trasladarse a todo el sistema cerámico
Intermedia	Divide grandes superficies en paños regulares	Reducir tensiones por dilatación, retracción o temperatura.	Más frecuente en exteriores, suelo radiante, zonas soleadas o grandes superficies
Colocación	Entre baldosas contiguas	compensar tolerancias y permitir rejuntado	No sustituye a las juntas de movimiento

PIEZAS CON PRECORTE

_En baldosas con precorte, dejar una junta de separación en correspondencia con el ancho del precorte, de forma que la junta real y el precorte mantengan continuidad estética.
_Antes de rejuntar, comprobar que los precortes están limpios y secos. Retirar el material de rejuntado sobrante con esponja húmeda antes de que endurezca sobre la superficie

CORTE RECTO

_Utilizar cortadora manual profesional o cortadora eléctrica con disco diamantado adecuado al tipo de baldosa, espesor y acabado.
_En baldosas de porcelánico, grandes formatos o acabados delicados, se recomienda el uso de disco diamantado de buena calidad, mesa estable y corte refrigerado cuando proceda. Realizar un marcado precorte superficial antes del corte definitivo.

CORTE EN L

_Los cortes en L deben ejecutarse con especial precaución, ya que el vértice interior del corte actúa como punto de concentración de tensiones.
_En el vértice interior del corte en L se recomienda realizar previamente una perforación circular con corona diamantada o broca adecuada, de modo que el ángulo interior quede redondeado. Después de realizar la perforación de alivio, se ejecutarán los cortes rectos hasta alcanzar el hueco perforado, evitando sobrepasar el vértice.
_En porcelánico, grandes formatos, láminas cerámicas o piezas rectificadas, los cortes en L deben realizarse preferentemente con herramientas de corte refrigeradas por agua o sistemas específicos de corte diamantado, evitando vibraciones y calentamientos excesivos

INSTALLATION RECOMMENDATIONS

HANDLING RECOMMENDATIONS

_Handle the tiles with gloves to avoid cuts from sharp edges or accidental breakage.

_For large-format tiles, move them one at a time and with at least two operators, unless specific lifting equipment or suction cups are used.

_For rectified tiles, take extra care when handling to avoid impacts between tiles and chipped edges.

RECEIPT AND PRIOR INSPECTION OF THE MATERIAL

_Before installation, check that the tiles are in perfect condition and that the reference received matches the order.

_Check shade, caliber, finish, texture, relief and any visible defects.

_Do not install tiles with visible defects. Once installed, any claim will not be accepted if the defect was detectable before installation.

_Keep box, batch, shade and caliber labels until the work has been completed.

SUBSTRATE PREPARATION

_The substrate must be clean, dry, stable, flat and free from dust, grease, paint, plaster, mortar residues, salts or poorly adhered parts.

_On recently prepared substrates, respect the curing times and moisture conditions before installation.

ADHESIVE SELECTION

_The adhesive must be selected according to the type of ceramic tile, its format, water absorption, dimensional stability, installation location, type of substrate and expected conditions of use.

_In general, unless specifically stated in the product technical documentation, the use of improved cementitious adhesives type C2 is recommended as the minimum performance level for installing ceramic tiles.

_For large-format tiles, substrates subject to deformation, floors with underfloor heating, outdoor areas or areas exposed to thermal changes, deformable adhesives, type S1 or S2, are recommended depending on the requirements of the system.

INSTALLATION RECOMMENDATIONS

_Installation must be carried out by qualified personnel on a clean, dry, stable, flat, cohesive substrate free from residues that could impair adhesion.

_For small-format tiles, installation may be carried out using the thin-bed method, with adhesive applied to the substrate using a suitable notched trowel.

_For large-format tiles (larger than 30x30), outdoor or wet areas, industrial and commercial flooring, ceramic coverings with underfloor heating, and coverings with thin ceramic slabs, the double-bonding technique is recommended. This consists of applying adhesive both to the substrate and to the back of the tile, ensuring that the entire ceramic surface is in contact with the adhesive and the substrate.

_The use of self-levelling spacer clips is recommended to avoid possible unevenness between tiles, especially in staggered layouts and large-format installations.

INSTALLATION JOINTS

_Installation without joints is not recommended. Joints of no less than 1.5 mm indoors and no less than 5 mm outdoors are recommended.

_For rectified tiles, although the joint may be narrower than for non-rectified tiles, it must not be eliminated.

_Selection of grouting material based on UNE 138002 standard:

INTENDED ENVIRONMENT OF THE CERAMIC COVERING	
Domestic use in dry rooms	CG1
Domestic use in wet rooms	CG2W
Outdoor floors and wall coverings	CG2WA
Conditions requiring water and vapor tightness	RG
Immersion conditions (pools, spas, baths, etc.) with chlorinated water treatment	CG2WA/RG
Immersion conditions (pools, spas, baths, etc.) with high requirements or with saline electrolysis treatment or seawater	RG
Conditions with high mechanical and/or chemical requirements	RG
Food and/or healthcare use conditions	RG

_Before grouting, joints must be clean, dry and free from adhesive residues, dust or loose particles.

_Remove excess material while fresh with a damp sponge, without overwashing the joint or leaving hardened haze on the tile.

PERIMETER, STRUCTURAL, INTERMEDIATE AND INSTALLATION JOINTS			
Joint type	Location	Function	Key recommendation
Perimeter	Where it meets walls, pillars, joinery or changes of plane	Absorb floor-covering movements against fixed elements	Do not fill with rigid material; leave approx. 5-8 mm or use a conservative criterion of >= 8 mm
Structural	Coincides with joints in the building or substrate	Allow movement of the structure	Must be respected and continued throughout the entire ceramic system
Intermediate	Divides large surfaces into regular sections	Reduce stresses caused by expansion, shrinkage or temperature changes	More common outdoors, with underfloor heating, in sunny areas or on large surfaces
Installation	Between adjacent tiles	Compensate for tolerances and allow grouting	Does not replace movement joints

TILES WITH PRE-CUTS

_For tiles with pre-cuts, leave a separation joint corresponding to the width of the pre-cut, so that the actual joint and the pre-cut maintain visual continuity.

_Before grouting, check that the pre-cuts are clean and dry. Remove excess grouting material with a damp sponge before it hardens on the surface.

STRAIGHT CUT

_Use a professional manual tile cutter or an electric cutter with a diamond blade suitable for the type of tile, thickness and finish.

_For porcelain tiles, large formats or delicate finishes, the use of a good-quality diamond blade, a stable table and water-cooled cutting, where appropriate, is recommended. Make a shallow pre-score mark before the final cut.

L-SHAPED CUT

_L-shaped cuts must be made with special care, as the internal corner of the cut acts as a stress concentration point.

_At the internal corner of the L-shaped cut, it is recommended to first make a circular hole using a diamond hole saw or a suitable drill bit, so that the internal angle is rounded. After making the relief hole, make the straight cuts until they reach the drilled opening, avoiding cutting beyond the corner.

_For porcelain tiles, large formats, ceramic slabs or rectified tiles, L-shaped cuts should preferably be made with water-cooled cutting tools or specific diamond cutting systems, avoiding vibration and excessive heating.

Enter with the QR code and view the technical manual for laying slabs.

RECOMENDACIONES DE INSTALACIÓN BALDOSAS CERÁMICAS 20MM

Las baldosas cerámicas de 20mm de espesor, clasificadas dentro del grupo BIa (porcelánico, presentan una baja absorción de agua [$<0.5\%$], alta dureza, altas prestaciones mecánicas, alta resistencia a la flexión y elevada carga de rotura.

Están especialmente indicadas principales para pavimentos exteriores (terrazas, jardines, cubiertas), zonas de alto tránsito, playas de piscinas, espacios comerciales, etc.

1. SISTEMAS DE COLOCACIÓN.

El producto admite diferentes sistemas de colocación, en función del uso previsto:

- Colocación con adherencia.
- Sistemas sobreelevados (plots).
- Colocación en seco sobre grava o césped.

1.1 Colocación con adherencia: Se recomienda el uso de adhesivos cementosos tipo C2TE S1/S2 mediante la técnica de doble encolado utilizando llana dentada $\geq 10\text{mm}$.

Requisitos de ejecución:

- Uso de llana dentada $\geq 10\text{ mm}$.
- Cobertura del adhesivo del 100%, especialmente en exterior.
- Eliminación total de huecos bajo la pieza.

Juntas:

- Junta mínima recomendada: 3 mm (interior).
- En exterior: recomendable $\geq 5\text{ mm}$.
- Respeto obligatorio de juntas estructurales.
- Ejecución de juntas de dilatación:
 - Exterior: cada 20-25 m².
 - Interior: cada 40 m².

1.2 Sistemas sobreelevados (plots): Se recomienda el apoyo mínimo de 4 puntos y refuerzo central en baldosas cerámicas de gran formato. Mantener una separación entre piezas 2-4mm (normalmente integrado en el plot). Antes de su instalación, se recomienda seguir las especificaciones técnicas del fabricante.

2. CORTES Y PERFORACIONES.

Debido a la alta resistencia mecánica y dureza del material, el corte requiere herramientas adecuadas.

2.1 Equipos recomendados.

Debido a la dureza y espesor del material:

- Recomendado:
 - Cortadoras eléctricas con refrigeración por agua.
 - Disco de diamante continuo específico para porcelánico.
- Equipos no recomendado:
 - Cortadoras manuales convencionales.
 - Equipos no diseñados para espesores de 20 mm.

2.2 Procedimiento de corte.

- Realizar los cortes en húmedo (con agua) ya que reduce el sobrecalentamiento, minimiza el polvo y mejora la calidad del corte y la vida útil del disco.
- Mantener avance constante y sin forzar la máquina.
- Evitar cortes en seco prolongados, avances excesivamente rápidos y discos desgastados o inadecuados.

3. CORTES EN ÁNGULO, EN "L" O FORMAS RECTANGULARES.

Este es el punto más crítico del proceso. Procedimiento obligatorio:

3.1 Perforación previa en esquinas:

- Realizar un orificio en cada esquina interior.
- Utilizar brocas diamantadas.
- Diámetro suficiente para eliminar concentraciones de tensión.

3.2 Corte posterior:

- Unir los orificios mediante cortes rectos.
- Ejecutar con disco diamantado y velocidad controlada.

Cortar directamente en ángulo sin perforación previa genera tensiones internas que derivan en fisuras o roturas diferidas.

4. PERFORACIONES.

Equipos:

- Brocas o coronas diamantadas.
- Taladro con control de velocidad.

Procedimiento:

- Trabajar a baja velocidad.
- Mantener refrigeración continua (agua).
- Aplicar presión moderada.

Evitar:

- Uso de percusión.
- Presión excesiva.
- Trabajo en seco.

El forzado de la perforación puede provocar microfisuras no visibles en el momento de ejecución.

INSTALLATION RECOMMENDATIONS – 20MM CERAMIC TILES

_Ceramic tiles with a thickness of 20mm, classified within group B1a (porcelain), feature very low water absorption (<0.5%), high hardness, excellent mechanical performance, high strength resistance, and high breaking load.

_They are particularly suitable for outdoor flooring applications such as terraces, gardens, rooftops, high-traffic areas, pool surrounds, commercial spaces, etc.

1. INSTALLATION SYSTEMS.

The product supports different installation systems depending on the intended use:

- Bonded installation.
- Raised systems (pedestals).
- Dry installation over gravel or grass.

1.1 Bonded Installation: The use of cementitious adhesives type C2TE S1/S2 is recommended, applied using the double-buttering technique with a notched trowel ≥ 10 mm.

Execution requirements:

- Use of notched trowel ≥ 10 mm.
- 100% adhesive coverage, especially in outdoor applications.
- Complete elimination of voids beneath the tile.

Joints:

- Minimum joint width: 3 mm (indoor).
- Outdoor: recommended ≥ 5 mm.
- Structural joints must be respected.
- Movement joints must be installed:
 - o Outdoor: every 20–25 m².
 - o Indoor: every 40 m².

1.2 Raised Systems (Pedestals): A minimum of 4 support points per tile is required, with central reinforcement recommended for large-format tiles. Maintain a joint spacing of 2–4 mm between tiles (typically integrated into the pedestal system). Before installation, it is recommended to follow the technical specifications provided by the pedestal manufacturer.

2. CUTTING AND DRILLING.

Due to the high mechanical strength and hardness of the material, proper tools are required for cutting.

2.1 Recommended Equipment.

Due to the material's hardness and thickness:

- Recommended:
 - o Electric tile cutters with water cooling.
 - o Continuous rim diamond blades specifically for porcelain.
- Not recommended:
 - o Conventional manual cutters.
 - o Equipment not designed for 20 mm thickness.

2.2 Cutting Procedure.

- Perform cuts using water (wet cutting), as it reduces overheating, minimizes dust, improves cut quality, and extends blade life.
- Maintain a steady feed rate without forcing the machine.
- Avoid prolonged dry cutting, excessive feed speed, or worn/inadequate blades.

3. ANGLE CUTS, “L” CUTS, AND RECTANGULAR CUTOUTS.

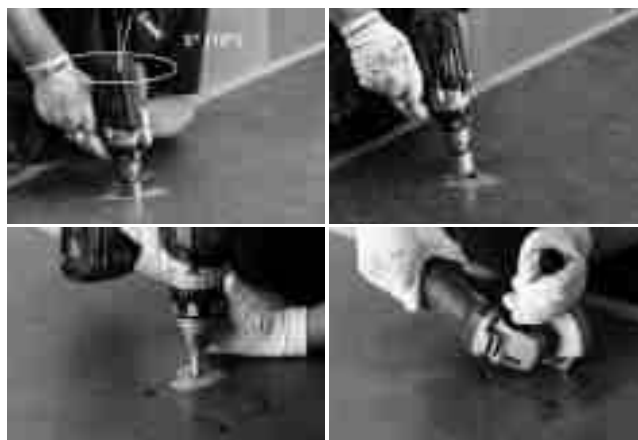

This is the most critical stage of the process. Mandatory Procedure.

3.1 Pre-drilling at corners:

- Drill a hole at each internal corner.
- Use diamond drill bits.
- Use a sufficient diameter to eliminate stress concentration.

3.2 Subsequent cutting:

- Connect the holes with straight cuts.
- Execute using a diamond blade at controlled speed.

Cutting directly at angles without prior drilling generates internal stress, leading to cracks or delayed breakage.

4. DRILLING

Equipment:

- Diamond drill bits or core bits.
- Drill with speed control.

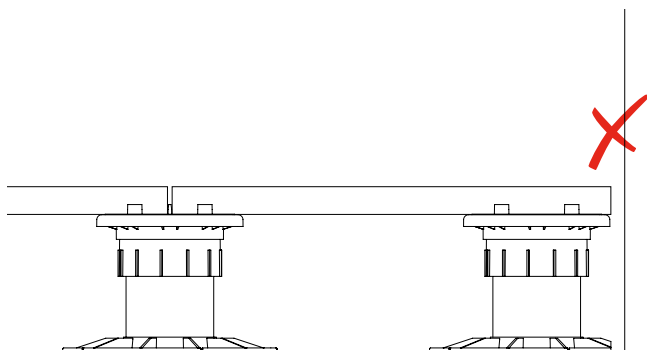

Procedure:

- Work at low speed.
- Maintain continuous water cooling.
- Apply moderate pressure.

Avoid:

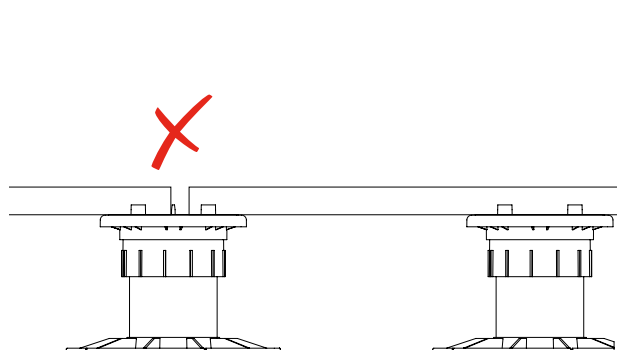

- Hammer/percussion drilling.
- Excessive pressure.
- Dry drilling.

Forcing the drilling process may cause microfractures that are not immediately visible.

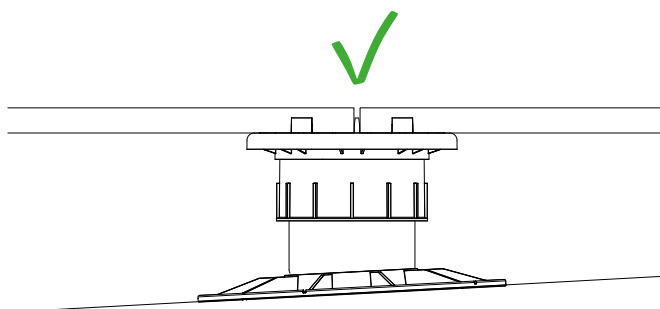

USO DE DILATADORES

Utilice dilatadores perimetrales para crear juntas de ancho fijo entre baldosas, y para evitar desplazamientos horizontales.

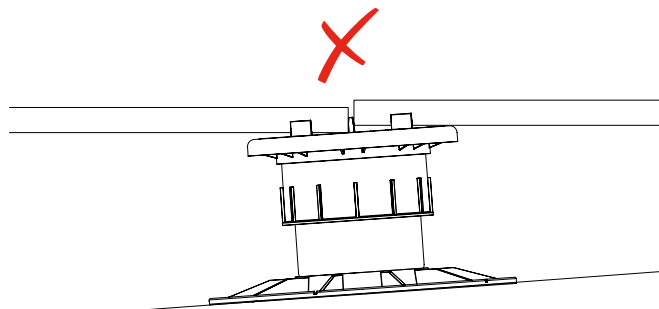

USING DILATORS

The perimeter of the tiles must be perfectly confined to avoid horizontal sliding. Perimeter dilators or elastic joints must be used to prevent such movement, always avoiding leaving open joints.

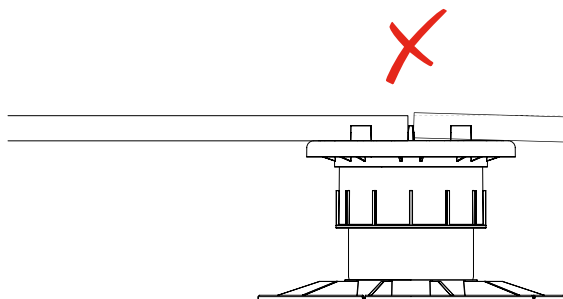

CORRECCIÓN DE PENDIENTE EN BASE O CABEZA

Evita que aparezcan pequeños escalones en la superficie del pavimento corrigiendo la pendiente en la base o cabeza del Plot.

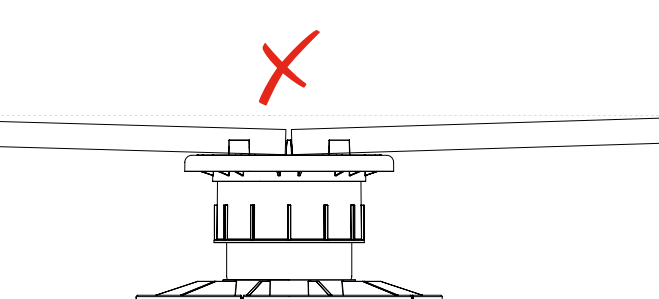

SLOPE CORRECTION AT THE BASE OR ON THE HEAD

Prevents small steps from appearing on the pavement surface by correcting the slope at the base or on the head of the pedestal.

BLOQUEO DE ALTURA DEL PLOT

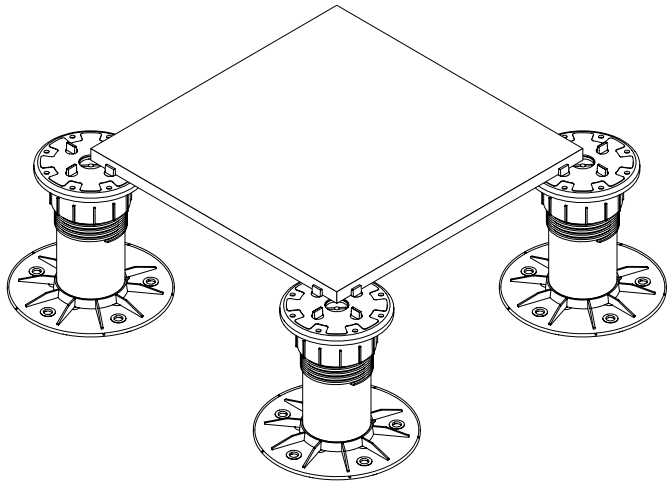

Evita movimientos indeseados del Plot a causa de vibraciones con el paso del tiempo. Reduce el mantenimiento que necesita la instalación.

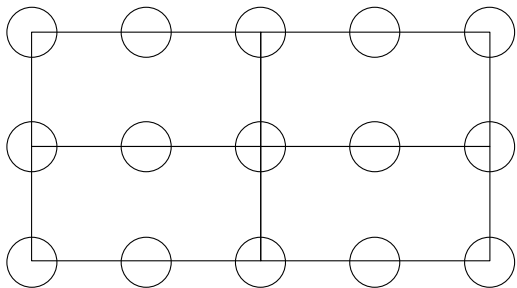

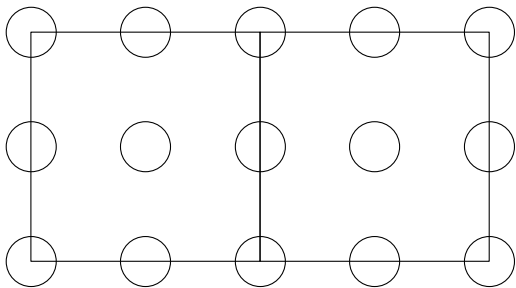

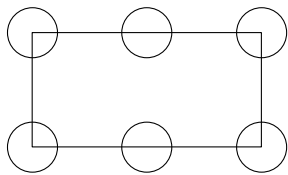

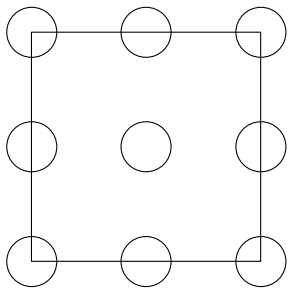

PEDESTAL HEIGHT LOCK

Prevents unwanted height movements of the pedestal due to vibrations over time. Reduces the maintenance needed by the installation.

INSTALACIÓN RECOMENDADA PARA BALDOSA PORCELÁNICA DE 20 MM DE ESPESOR:
RECOMMENDED INSTALLATION FOR 20 MM THICK CERAMIC TILES:

Formato 100 * 100 cm	TILE FORMAT 39 * 39"	Formato 50 * 100 mm	TILE FORMAT 20 * 39"
Uso privado o público.	Private use o public use	Uso privado o público.	Private use o public use
9 Plots en todos los casos.	9 pedestals in all cases.	6 Plots en todos los casos.	6 pedestals in all cases.

El colocador debe seguir siempre las recomendaciones del fabricante de plots. The installer must always follow the plot manufacturer's recommendations

LIMPIEZAS TRAS LA COLOCACIÓN

_Se recomienda realizar con agua e inmediatamente tras la instalación del material para evitar que los residuos cementosos se endurezcan y se queden adheridos a la superficie de las baldosas cerámicas.

_Si no se ha realizado la limpieza tras su colocación y quedan residuos adheridos limpiar con un detergente en base ácida o con ácidos diluidos (ej. Vinagre) y, posteriormente, enjuagar con abundante agua. No utilizar productos puros podrían atacar la superficie de las baldosas cerámicas. Esta limpieza no debe realizarse sobre las baldosas cerámicas recién colocadas.

_Se recomienda realizar con agua e inmediatamente tras la instalación del material para evitar que los residuos cementosos se endurezcan y se queden adheridos a la superficie de las baldosas cerámicas.

LIMPIEZA HABITUAL

_Se recomienda barrer o aspirar la superficie y posteriormente lavar con agua o solución diluida de detergente neutro. No utilizar detergentes en base ácida o alcalina.

LIMPIEZA EXTRAORDINARIA DE MANCHAS E INCRUSTACIONES

_Ante el derrame de ciertos productos sobre la superficie de las baldosas cerámicas que pueden ocasionar manchas o incrustaciones que no pueden ser eliminadas mediante la limpieza habitual, se recomienda la utilización de agentes de limpieza y procedimientos específicos de limpieza cuya elección debe realizarse en función del tipo de mancha.

Antes de proceder a limpiar la totalidad de la superficie se recomienda comprobar su efecto sobre una pequeña zona de la superficie de la baldosas cerámica para comprobar la existencia de degradaciones químicas. En la siguiente tabla se detallan los productos de limpieza más adecuados a cada tipo de mancha:

TIPO DE SUCIEDAD INCRUSTADA	SOLUCIÓN FILA	SOLUCIÓN FABER
Suciedad orgánica ligera (diaria)	CLEANER PRO	FLOOR CLEANER
Suciedad orgánica intensa	PS87 PRO	DEEP DEGREASER / TILE CLEANER
Tintes, rotulador, pintura plástica		
Residuos de detergentes, jabones y ceras		DEEP DEGREASER
Grasa, aceite, refrescos, comidas y salsas		
Goma, neumáticos		
Residuos junta epoxi	CR10	EPOXY CLEANER
Residuos junta cementosa, salitre	DETERDEK PRO-PHZERO	CEMENT REMOVER
Residuos calcáreos		TILE CLEANER GEL
Rayas de metales		
Óxidos	DETERDEK-NORUST	DETERDEK
Pintadas de grafitis	NOPAINT STAR	GRAFITTI REMOVER
Sprayacrílicos, alquídicos, ynitrosintéticos		GRAFITTI REMOVER / KIT SILI-GONE
Verdín, algas, musgos, líquenes	ALGACID	DEEP DEGREASER / COLOURED STAIN REMOVER
Ennegrecidos exteriores		
Residuos de silicona y pegamentos	ZERO SIL	KIT SILI-GONE
Residuos espuma y poliuretano		EPOXY CLEANER
Residuos cinta adhesiva, cercos de ventosas		SOLVENT STRIPPER
Cera de vela, resina de árboles		DEEP DEGREASER
Suciedad en la junta		FUGANET

CLEANING AFTER INSTALLATION

_It is recommended to clean with water immediately after installation of the material to prevent cement residues from hardening and adhering to the surface of the ceramic tiles.

_If cleaning was not performed after installation and residues remain adhered, clean with an acid-based detergent or diluted acids (e.g., vinegar), and then rinse thoroughly with plenty of water. Do not use undiluted products, as they may damage the surface of the ceramic tiles. This cleaning should not be done on newly installed ceramic tiles.

_It is recommended to clean with water immediately after installation of the material to prevent cement residues from hardening and adhering to the surface of the ceramic tiles.

REGULAR CLEANING

_It is recommended to sweep or vacuum the surface and then wash it with water or a diluted neutral detergent solution. Do not use acid- or alkaline-based detergents.

DEEP CLEANING OF STAINS AND DEPOSITS

_When certain substances are spilled on the surface of ceramic tiles, causing stains or deposits that cannot be removed by regular cleaning, the use of specific cleaning agents and procedures is recommended. The choice of method should depend on the type of stain.

_Before proceeding to clean the entire surface, it is advisable to test the cleaning product on a small area of the ceramic tile surface to check for any chemical degradation. The following table details the most suitable cleaning products for each type of stain:

TYPE OF INCRUSTED DIRT	PRODUCT BY FILA	PRODUCT BY FABER
Light organic everyday dirt	CLEANER pro	FLOOR CLEANER
Heavy organic dirt		DEEP DEGREASER / TILE CLEANER
Fat, grease, oil, soft drinks, food and sauce		DEEP DEGREASER
Rubber, tyres	PS87 pro	
Ink, marker pen, plastic paint		DEEP DEGREASER/TILE CLEANER
Detergent, soap or wax remains		
Epoxy grout residues	CR10	EPOXY CLEANER
Cementitious grout residues, saltpeter		CEMENT REMOVER
Limescale	DETERDEK pro-PHZERO	
Metal scratches		TILE CLEANER GEL
Rust	DETERDEK-NORUST	DETERDEK
Graffiti		GRAFITTI REMOVER
Acrylic, alkyd & nitrosynthetic spray paint	NOPAINT STAR	GRAFITTI REMOVER / KIT SILI-GONE
Green plant stains, algae, moss, lichen		DEEP DEGREASER / COLOURED STAIN REMOVER
Outdoor black mould	ALGACID	
Silicon & glue residues		KIT SILI-GONE
Foam & polyurethane residues		EPOXY CLEANER
Marks made by adhesive tape or suction cups	ZERO SIL	SOLVENT STRIPPER
Candlewax, tree resin		DEEP DEGREASER
Dirty tile joints	FUGANET	GROUT CLEANER

peronda

Las baldosas cerámicas una vez que llegan al final de su vida útil son un residuo inerte, que para su correcta gestión debe ser entregado a un gestor autorizado de residuos, favoreciendo su reciclado. Once ceramic tiles reach the end of their useful life, they are inert waste. For their proper management, they should be given to an authorized waste management body for recycling purposes.
